PUBLIC INFORMATION CENTRE 2 SUMMARY REPORT
Highway 401 Nagle Road Interchange Study
GWP 4059-17-00

This page intentionally left blank.

1.0 Introduction

The second Public Information Centre (PIC) for this study was held on January 18, 2023. The purpose of PIC 2 was to present and gather feedback on the evaluation of alternatives, the preliminary preferred plan and the preliminary assessment of the anticipated environmental impacts and mitigation measures. The study area is shown on Figure 1.

Figure 1: Key Plan

2.0 Purpose

This second PIC forms part of the overall consultation plan for the project, which is designed to involve the public and stakeholders throughout the study to review study information, identify concerns and provide valuable feedback and input to project planning.

3.0 Location, Date, and Time

The second PIC was held on Wednesday, January 18, 2023, at the Cobourg Community Centre, located at 750 D'Arcy Street, Cobourg, Ontario. External agencies and municipal staff were invited to attend an External Agency Drop-In session prior to the PIC from 3:00 PM to 4:00 PM. The general public session was held at the same location from 4:00 PM to 7:00 PM.

4.0 Notification

Notification letters providing information about PIC 2, including the date and time for the meeting, were sent via direct mail and/or email to the Northumberland-Peterborough South MPP on December 28, 2022, and 48 external agency contacts.

The Ontario Government Notice (OGN) for the PIC was sent to approximately 2070 residents and business owners during the week of January 4, 2023, via Canada Post unaddressed admail, and to 55 members of the general public via direct mail and/or email. In addition, the OGN was also posted on the Town of Cobourg website on January 5, 2023, and on the Township of Hamilton Facebook page on January 6, 2023. The OGN was also published within the *Northumberland News* (in English) on Thursday, January 5, 2023, to advise residents of the upcoming PIC.

In addition, individual notification letters were sent via standard mail delivery to 10 potentially impacted property owners on Wednesday, January 4, 2023. Each letter included an invitation to participate in a separate one-on-one meeting with members of the project team, in advance of PIC 2, to discuss the impacts to their respective property and discuss any initial questions or concerns they may have.

Letter notification to Indigenous communities was issued via email to the following communities / organizations on January 9, 2023:

Indigenous Communities

- Chief Kelly LaRocca, Mississaugas of Scugog Island First Nation
- Chief Ted Williams, Chippewas of Rama First Nation
- Chief Dave Mowat, Alderville First Nation
- Chief Joanne P. Sandy, Beausoleil First Nation
- Chief Keith Knott, Curve Lake First Nation
- Chief Donna Big Canoe, Chippewas of Georgina Island
- Chief Laurie Carr, Hiawatha First Nation
- Chief Stacey LaForme, Mississaugas of the Credit First Nation
- Métis Consultation Unit, Métis Nation of Ontario Head Office
- Karry Sandy McKenzie, Claims Coordinator, Williams Treaties First Nations

- Kawartha Nishnawbe Council

Copies of the OGN, newspaper publications and notification letters are provided in **Appendix A**.

5.0 Staff Attendance

Key Ministry, Town and Stantec staff in attendance at PIC 2 included:

MTO	Stantec	Town of Cobourg
• Muhammed Waseem	• Gregg Cooke	• Terry Hoekstra
• Erin Pipe	• Diana Addley	• Laurie Wills
• Nancy Sinclair	• Tom McClurkin	• Rob Franklin
• Sevag Amen	• Jenn Robinson	• Anne Taylor Scott
• Lee Collins		• Vanessa Reusser
• Prabin Sharma		

6.0 Reference Materials and Handouts

The following displays were presented at the PIC:

- Title Slide
- Welcome to Public Information Centre 2
- About the Project
- Class Environmental Assessment (EA) Process
- Public Information Centre 1 - Summary
- Study Background
- Existing Environment
- Evaluation of Interchange Alternatives
- Evaluation Criteria
- Evaluation of Interchange Alternatives (Summary Table)
- Nagle Road – Preferred Plan
- Potential Impacts and Mitigation Measures
- Thank you for attending / Next Steps

A copy of the PIC displays is included in **Appendix B**.

7.0 Format

The PIC was organized as a drop-in format at the Cobourg Community Centre. Text panels and illustrative displays were available for review, and members of the study team were available at the PIC to discuss concerns and answer questions about the project. While the public was encouraged to attend the PIC between 4:00 PM to 7:00 PM, a separate external agency session was held in advance from 3:00 PM to 4:00 PM. Reference materials were also made available at PIC 2, including the Cobourg East Secondary Plan, Town of Cobourg Official Plan, Township of Hamilton Official Plan schedules, PIC 1 information, and the MTO Class EA document.

Attendees were encouraged to sign-in to the PIC. In addition, attendees were encouraged to share their thoughts in writing and submit them to the project team via the comment sheet box provide at the PIC, or by mail or email by February 17, 2023.

In total 12 representatives from external agencies and 83 members of the public attended PIC 2.

The information available at the PIC, including a copy of the displays and the comment form is provided in **Appendix B**.

8.0 Comments Received

Approximately 6 comment forms were received at PIC 2 and 6 emails were received by the end of the PIC comment period (i.e., February 17, 2023). Copies of the comment forms and email correspondence received at and following PIC 2 are provided in **Appendix C**. All personal information has been removed, consistent with the *Freedom of Information and Protection of Privacy Act*.

An overview of comments received at and following the PIC, and the responses provided and/or action taken by the project team is presented in **Table 1**. In addition, the names and addresses provided in the completed comment forms, sign-in sheets and email correspondence were added to or updated on the study mailing list.

Table 1: Public Comment Received and Response Provided/Action Taken

Comment	Response Provided and/or Action Taken
Cyclists	
<ul style="list-style-type: none"> Positive feedback regarding the implementation of bike lanes across the new Nagle Road bridge to improve cyclist safety. 	<p>Noted.</p>
Property Impacts	
<ul style="list-style-type: none"> Concern for potential impacts to private property. 	<p>Property owners who have the potential to be directly impacted (i.e., property acquisition required, in whole or in part) by the preliminary preferred plan have been contacted by letter (and email, where possible) to discuss the preliminary preferred plan, the anticipated impacts to their property and any questions or concerns they may have.</p> <p>Individual virtual meetings were held with each directly impacted property owner in advance of PIC 2.</p>
Traffic / Noise / Air Pollution	
<ul style="list-style-type: none"> Concern regarding the potential for an increase in noise and air pollution. 	<p>A Noise Assessment and Air Quality Assessment are being undertaken as part of this study to assess potential changes in traffic noise and/or air quality associated with the Recommended Plan, and to determine the need for mitigation measures. The Class EA study process, including the findings of the technical studies, the potential environmental impacts of the project and proposed mitigation measures, will be documented within a Transportation Environmental Study Report (TESR), which is tentatively scheduled to be completed in 2023.</p>
<ul style="list-style-type: none"> Concern regarding potential traffic impacts to the Baltimore community and along Danforth Road East as a result of the future interchange. 	<p>Leading up to and following completion of the full buildup of the Cobourg East Community, it is anticipated that there will be an increase in vehicular traffic travelling on Nagle Road between Cobourg and the Township of Hamilton, as a result of being adjacent to an urban growth area. Additional transportation studies will be completed within the Town of Cobourg boundary in the future to confirm the need for additional roadway improvements as development of the Cobourg East Community progresses. In order to be prepared for the potential future growth conditions outside of the Town of Cobourg boundary, the Township of Hamilton may also wish to complete long-range planning studies, including a transportation study, that would review the existing road</p>

PUBLIC INFORMATION CENTRE 2 SUMMARY REPORT

Highway 401 Nagle Road Interchange Study

GWP 4059-17-00

Comment	Response Provided and/or Action Taken
	network and include recommendations for road improvements such as road widenings and reconstruction.
Detours	
<ul style="list-style-type: none"> Concern for traffic being redirected onto Danforth Road East and other smaller streets and their inability to support large trucks and increased traffic volume during construction. 	<p>Potential detour routes have been identified as part of this study to help plan for traffic detours along dedicated routes during the demolition / construction of the Nagle Road bridge and construction of the future interchange. The number and duration of those closures will be confirmed during detail design. While a few full closures of Highway 401 are anticipated during demolition and construction of the Nagle Road bridge, significant traffic delays are not anticipated within the surrounding area as this work will be completed overnight when traffic volumes are relatively low. The need for additional flagging operations and a police presence to assist with traffic flow at specific locations will be determined during detail design.</p>
<ul style="list-style-type: none"> Concerns regarding potential traffic impacts of east-west traffic being detoured through Alnwick/Haldimand Township during closures of Highway 401 during construction. 	<p>Potential detour routes have been identified as part of this study to help plan for traffic detours along dedicated routes during the demolition of the existing Nagle Road bridge and construction of the new bridge. At this time, a section of Highway 401, between County Road 45 and County Road 25, is proposed to be closed for one overnight duration (approximately 12-18 hours) to accommodate demolition of the existing bridge. During this time, Highway 401 traffic will be rerouted to CR45, CR22, and CR 25. Additional short-term overnight Highway 401 closures may be required during the construction of the new bridge. The number and duration of those full closures will be confirmed during detail design.</p>
Natural Environment / Groundwater	
<ul style="list-style-type: none"> Concern for potential impacts to the natural environment, including habitat loss and the impediment of migratory species. 	<p>The Class EA study process, including the findings of the technical studies, the potential environmental impacts of the project and proposed mitigation measures, will be documented within a TESR, which is tentatively scheduled to be completed in 2023. In addition, opportunities to enhance wildlife connectivity and reduce risks associated with the highway will be reviewed during detail design. Targeted species surveys will be carried out for species that have the potential to be present based on the availability of suitable habitat.</p>
<ul style="list-style-type: none"> Concern for potential impacts to the existing groundwater table and community wells. 	<p>Please note that the study area is located outside the limits of source water protection areas, and while impacts to groundwater supply is not anticipated, potential impacts to groundwater in the vicinity of the project will be further reviewed during detail design phase of the project.</p>

PUBLIC INFORMATION CENTRE 2 SUMMARY REPORT

Highway 401 Nagle Road Interchange Study

GWP 4059-17-00

Comment	Response Provided and/or Action Taken
General Concerns	
<ul style="list-style-type: none"> Questions about the timing of the Nagle Road bridge and new interchange construction. 	<p>Please note that construction of the Recommended Plan is being planned in phases. This will allow for the replacement of the existing Nagle Road bridge to be independent of construction of the Nagle Road interchange ramps. While the timing of construction of the Nagle Road interchange is currently unknown, it is anticipated that the traffic demands associated with growth and development of the Cobourg East Secondary Plan area will necessitate a new interchange at Nagle Road.</p>
<ul style="list-style-type: none"> Suggestion to mirror the ramp configuration on the north side of Highway 401 to the proposed ramp configuration on the south side of the highway. 	<p>The loop ramp on the north side of Highway 401 provides a free-flow movement, which is required to accommodate the anticipated large volume of traffic from the south (Nagle Road) to the west (Highway 401). If the configuration on the south side was used on the north side, the intersection could not accommodate the significant left-turn movement from the south to the west.</p>
<ul style="list-style-type: none"> Request for clarification regarding the method of notification for PIC 2 to Alnwick/Haldimand Township residents. 	<p>A comprehensive mail out of the Notice of PIC 2 was undertaken which included a Canada Post Ad Mail Drop on January 9, 2023, to approximately 2,070 residences located along Canada Post delivery routes originating within the study area, some of which deliver to residences within the Township of Alnwick/Haldimand, along County Road 22 and Noble Road, among other local roads within the Township. The mail out also included, but was not limited to, mailing/emailing a copy of the notice to those on the study contact list (January 4, 2023), posting a copy of the notice on the Town of Cobourg website (January 5, 2023) and Township of Hamilton facebook page (January 6, 2023), and publishing a copy of the notice within the Northumberland News newspaper (January 5, 2023).</p>

9.0 External Agency Participation

An invitation to attend a separate External Agency Drop-In session from 3:00 PM to 4:00 PM (i.e., in advance of the public session) was sent via mail and/or email to external agencies on the project mailing list on January 4, 2023. Representatives from the following external agencies attended the External Agency Drop-In session for PIC 2:

- Township of Hamilton
- Northumberland County
- Bicycle Action Committee of Sustainable Cobourg

10.0 Next Steps

The feedback received at and following PIC 2 is being considered by the project team and will help to confirm the Recommended Plan. The Class EA study process, including the findings of the technical studies, the potential environmental impacts of the project and proposed mitigation measures, will be documented within a TESR. A Notice of Study Completion will be issued once the TESR has been completed, at which time it will become available for public comment for a minimum of 30 days.

NOTICE OF PUBLIC INFORMATION CENTRE 2 PRELIMINARY DESIGN AND CLASS ENVIRONMENTAL ASSESSMENT Highway 401 Nagle Road Interchange Study, GWP 4059-17-00

The Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) are undertaking a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

THE PROCESS

This study is a "Group B" project under the Class EA for Provincial Transportation Facilities (2000) and includes undertaking environmental and engineering investigations and seeking input from the public, local municipalities, external ministries/agencies, Indigenous communities, and businesses. Upon completion of preliminary design, a Transportation Environmental Study Report (TESR) will be prepared and made available for public comment. Notices will be published in local newspapers to advise the public of the TESR public comment period.

PUBLIC INFORMATION CENTRE 2

This notice is to announce the second Public Information Centre (PIC) for this study. The first PIC for this study was held on September 18, 2019, to present and gather feedback on the study background, Class EA process, Nagle Road interchange design alternatives and existing study area conditions. A second PIC has been arranged to present and gather feedback on the evaluation of alternatives, the preliminary preferred plan, and the preliminary assessment of the anticipated environmental impacts and mitigation measures. Members of the study team will be present to discuss the study with you and to answer any questions you may have.

This in-person PIC will be held in a drop-in format and has been scheduled as follows:

Date: Wednesday, January 18, 2023

Location: Cobourg Community Centre, 750 D'Arcy Street, Cobourg, Ontario

Time: 4:00 PM to 7:00 PM

COMMENTS

You are encouraged to participate in this study and to provide your comments to members of the study team. If you wish to have your name added to the project mailing list and/or have any questions about this study, please contact:

Dear Mr. Piccini,

**Reference: Notice of Public Information Centre 2
Preliminary Design and Class Environmental Assessment
Highway 401 Nagle Road Interchange Study (GWP 4059-17-00)**

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This project is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you of the second and final Public Information Centre (PIC) related to this study. The first PIC for this study was held on September 18, 2019, to present and gather feedback on the study background, Class EA process, Nagle Road interchange design alternatives and existing study area conditions. As indicated within the attached notice, PIC 2 has been scheduled as follows:

Wednesday, January 18, 2023
4:00 PM to 7:00 PM
Cobourg Community Centre
750 D'Arcy Street, Cobourg

External agencies and municipal staff are also invited to attend an external agency drop-in meeting in advance of the PIC, between 3:00 PM to 4:00 PM, at the above-mentioned date and location.

The session will provide you with an opportunity to review the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures and discuss any questions or concerns directly with representatives of the study team.

The Notice of PIC 2 will appear in the *Northumberland News* on January 5, 2023.

Information that has been shared to date is available for your review on the project website (www.highway401cobourgcolborne.ca) including study notices, background information and the information presented at PIC 1.

Should you have any questions regarding this study, please do not hesitate to contact the undersigned.

Sincerely,

Muhammad Waseem, P.Eng.

Good Afternoon Chief LaRocca,

Happy New Year, I hope you are doing well. Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. The attached documents have additional details for your consideration.

The purpose of this letter is to notify you that Public Information Centre (PIC) 2 has been arranged to present and gather feedback regarding the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures, and to provide the public with an opportunity to discuss any questions or concerns directly with representatives of the study team. PIC 2 has been scheduled for Wednesday, January 18, 2023, from 4:00 PM to 7:00 PM at the Cobourg Community Centre located at 750 D'Arcy Street, Cobourg. PIC displays and background information will also be available on the project website (www.highway401cobourgcolborne.ca).

MTO welcomes the opportunity to discuss this project in further detail with your community. Should you have any questions, comments, or concerns related to this project please let me know.

Thank you,

**Reference: Notice of Public Information Centre 2
Preliminary Design and Class Environmental Assessment
Highway 401 Nagle Road Interchange Study, GWP 4059-17-00**

Dear Chief Kelly LaRocca:

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This study is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you that Public Information Centre (PIC) 2 has been arranged to present and gather feedback regarding the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures, and to provide the public with an opportunity to discuss any questions or concerns directly with representatives of the study team.

PIC 2 has been scheduled for Wednesday, January 18, 2023, from 4:00 PM to 7:00 PM at the Cobourg Community Centre located at 750 D'Arcy Street, Cobourg. The attached notice contains additional details for your consideration.

Information collected during this study will be used in accordance with the *Freedom of Information and Protection of Privacy Act*. All information and comments, with the exception of personal information and other protected information, will become part of the public record. Good Afternoon Chief Mowat,

Happy New Year, I hope you are doing well. Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. The attached documents have additional details for your consideration.

The purpose of this letter is to notify you that Public Information Centre (PIC) 2 has been arranged to present and gather feedback regarding the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures, and to provide the public with an opportunity to discuss any questions or concerns directly with representatives of the study team. PIC 2 has been scheduled for Wednesday, January 18, 2023, from 4:00 PM to 7:00 PM at the Cobourg Community Centre located at 750 D'Arcy Street, Cobourg. PIC displays and background information will also be available on the project website (www.highway401cobourgcolborne.ca).

MTO welcomes the opportunity to discuss this project in further detail with your community. Should you have any questions, comments, or concerns related to this project please let me know.

Thank you,

Peter Copping

Highway 401 Nagle Road Interchange Study, GWP 4059-17-00**

Dear Chief Mowat:

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This study is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you that Public Information Centre (PIC) 2 has been arranged to present and gather feedback regarding the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures, and to provide the public with an opportunity to discuss any questions or concerns directly with representatives of the study team.

PIC 2 has been scheduled for Wednesday, January 18, 2023, from 4:00 PM to 7:00 PM at the Cobourg Community Centre located at 750 D'Arcy Street, Cobourg. The attached notice contains additional details for your consideration.

Information collected during this study will be used in accordance with the *Freedom of Information and Protection of Privacy Act*. All information and comments, with the exception of personal information and other protected information, will become part of the public record. Please contact me if you have accessibility requirements in order to participate in this project.

Highway 401 Nagle Road Interchange Study, GWP 4059-17-00**

Dear Chief Donna Big Canoe:

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This study is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you that Public Information Centre (PIC) 2 has been arranged to present and gather feedback regarding the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures, and to provide the public with an opportunity to discuss any questions or concerns directly with representatives of the study team.

PIC 2 has been scheduled for Wednesday, January 18, 2023, from 4:00 PM to 7:00 PM at the Cobourg Community Centre located at 750 D'Arcy Street, Cobourg. The attached notice contains additional details for your consideration.

Information collected during this study will be used in accordance with the *Freedom of Information and Protection of Privacy Act*. All information and comments, with the exception of personal information and other protected information, will become part of the public record. Please contact me if you have accessibility requirements in order to participate in this project.

January 4, 2023

Attention: Mr. Arthur Anderson

Chief Administrative Officer

Hamilton Township

8285 Majestic Hills Drive, P.O. Box 1060

Cobourg, ON K9A 4W5

Dear Arthur,

Reference: Notice of Public Information Centre 2

**Preliminary Design and Class Environmental Assessment Highway 401 Nagle Road Interchange Study
(GWP 4059-17-00)**

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This project is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you that a second and final Public Information Centre (PIC) related to this study has been planned. In addition, external agencies and municipal staff are invited to attend an external agency drop-in session on **Wednesday, January 18, 2023**, from **3:00 PM to 4:00 PM**, at the **Cobourg Community Centre, 750 D'Arcy Street, Cobourg**. The external agency session is being held in advance of a public session planned between 4:00 PM and 7:00 PM at the same location. The external agency drop-in session will provide you with an opportunity to review the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures and discuss any questions or concerns directly with representatives of the study team.

Additional study information is available for review on the study website (www.highway401cobourgcolborne.ca) including study notices, background information and the information presented at PIC 1, held on September 18, 2019. If you are unable to attend the external agency drop-in session and/or would like further information regarding this study, please do not hesitate to contact the undersigned or one of the one of the study team members named in the attached notice.

Regards,

Stantec Consulting Ltd.

Attention: Chief Ellard Beaven

Chief
Cobourg Fire Department
111 Elgin Street East,
Cobourg, ON K9A 1A1

Dear Ellard,

Reference: Notice of Public Information Centre 2

**Preliminary Design and Class Environmental Assessment Highway 401 Nagle Road Interchange Study
(GWP 4059-17-00)**

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This project is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you that a second and final Public Information Centre (PIC) related to this study has been planned. In addition, external agencies and municipal staff are invited to attend an external agency drop-in session on **Wednesday, January 18, 2023**, from **3:00 PM to 4:00 PM**, at the **Cobourg Community Centre, 750 D'Arcy Street, Cobourg**. The external agency session is being held in advance of a public session planned between 4:00 PM and 7:00 PM at the same location. The external agency drop-in session will provide you with an opportunity to review the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures and discuss any questions or concerns directly with representatives of the study team.

Additional study information is available for review on the study website (www.highway401cobourgcolborne.ca) including study notices, background information and the information presented at PIC 1, held on September 18, 2019. If you are unable to attend the external agency drop-in session and/or would like further information regarding this study, please do not hesitate to contact the undersigned or one of the one of the study team members named in the attached notice.

Attention: Ms. Brooke Gillispie
Roads Operations Manager
Northumberland County
555 Courthouse Road,
Cobourg, ON K9A 5J6

Dear Brooke,

Reference: Notice of Public Information Centre 2

**Preliminary Design and Class Environmental Assessment Highway 401 Nagle Road Interchange Study
(GWP 4059-17-00)**

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This project is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you that a second and final Public Information Centre (PIC) related to this study has been planned. In addition, external agencies and municipal staff are invited to attend an external agency drop-in session on **Wednesday, January 18, 2023**, from **3:00 PM to 4:00 PM**, at the **Cobourg Community Centre, 750 D'Arcy Street, Cobourg**. The external agency session is being held in advance of a public session planned between 4:00 PM and 7:00 PM at the same location. The external agency drop-in session will provide you with an opportunity to review the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures and discuss any questions or concerns directly with representatives of the study team.

Additional study information is available for review on the study website (www.highway401cobourgcolborne.ca) including study notices, background information and the information presented at PIC 1, held on September 18, 2019. Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This project is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you that a second and final Public Information Centre (PIC) related to this study has been planned. In addition, external agencies and municipal staff are invited to attend an external agency drop-in session on **Wednesday, January 18, 2023**, from **3:00 PM to 4:00 PM**, at the **Cobourg Community Centre, 750 D'Arcy Street, Cobourg**. The external agency session is being held in advance of a public session planned between 4:00 PM and 7:00 PM at the same location. The external agency drop-in session will provide you with an opportunity to review the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures and discuss any questions or concerns directly with representatives of the study team.

Additional study information is available for review on the study website (www.highway401cobourgcolborne.ca) including study notices, background information and the information presented at PIC 1, held on September 18, 2019. If you are unable to attend the external agency drop-in session and/or would like further information regarding this study, please do not hesitate to contact the undersigned or one of the one of the study team members named in the attached notice.

Attention: Chief Kelly Serson

Director of Emergency Services/ Fire Chief
Hamilton Township Fire Department

Dear Kelly,

Reference: Notice of Public Information Centre 2

**Preliminary Design and Class Environmental Assessment Highway 401 Nagle Road Interchange Study
(GWP 4059-17-00)**

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This project is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

The purpose of this letter is to notify you that a second and final Public Information Centre (PIC) related to this study has been planned. In addition, external agencies and municipal staff are invited to attend an external agency drop-in session on **Wednesday, January 18, 2023**, from **3:00 PM to 4:00 PM**, at the **Cobourg Community Centre, 750 D'Arcy Street, Cobourg**. The external agency session is being held in advance of a public session planned between 4:00 PM and 7:00 PM at the same location. The external agency drop-in session will provide you with an opportunity to review the evaluation of alternatives, the preliminary preferred plan, the preliminary assessment of the anticipated environmental impacts and mitigation measures and discuss any questions or concerns directly with representatives of the study team.

Additional study information is available for review on the study website (www.highway401cobourgcoborne.ca) including study notices, background information and the information presented at PIC 1, held on September 18, 2019. If you are unable to attend the external agency drop-in session and/or would like further information regarding this study, please do not hesitate to contact the undersigned or one of the one of the study team members named in the attached notice.

Address 2

Dear Sir/Madam,

**Reference: Notice of Public Information Centre 2 and Impacts to Property
Preliminary Design and Class Environmental Assessment
Highway 401 Nagle Road Interchange Study (GWP 4059-17-00)**

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This project is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

As part of this Class EA Study, the study team has undertaken field investigations and technical analyses to identify and evaluate preliminary design alternatives related to the above study objectives. The first Public Information Centre (PIC 1) for this study was held on September 18, 2019, to present and gather feedback on the study background, Class EA process, Nagle Road interchange design alternatives and existing study area conditions.

Based on the findings of the evaluations, a preliminary preferred plan has been identified. **This letter is to advise you of potential impacts to your property identified in association with the future footprint of Highway 401 and Nagle Road interchange improvements.** The attached figure provides an illustration of the preferred plan. The approximate area of your property impacted by the preliminary preferred plan is indicated in the attached plan. As noted on the preliminary plan attached, the property boundaries are subject to final legal survey.

We would also like to advise you that the second and final PIC has been planned for this study, and is scheduled as follows:

Wednesday, January 18, 2023

4:00 PM to 7:00 PM

Cobourg Community Centre

750 D'Arcy Street, Cobourg

This PIC has been arranged to present and gather feedback on the evaluation of alternatives, the preliminary preferred plan, and the preliminary assessment of the anticipated environmental impacts and mitigation measures. It would be appreciated if your comments could be received by Friday, February 17, 2023. Please refer to the attached notice for additional information.

The Town and MTO are committed to working with property owners to help to ensure that they understand the property acquisition process and their rights. Should you have any questions, or would like to meet directly with the study team to discuss the impacts to your property, please contact either one of the following:

Attention: Name

Address 1

Address 2

Dear Sir/Madam,

**Reference: Notice of Public Information Centre 2 and Impacts to Property
Preliminary Design and Class Environmental Assessment
Highway 401 Nagle Road Interchange Study (GWP 4059-17-00)**

Stantec Consulting Ltd. was retained by the Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

This project is being carried out in accordance with the approved environmental planning process for Group 'B' projects under the MTO Class Environmental Assessment (Class EA) for Provincial Transportation Facilities (2000) and will be documented in a Transportation Environmental Study Report (TESR).

As part of this Class EA Study, the study team has undertaken field investigations and technical analyses to identify and evaluate preliminary design alternatives related to the above study objectives. The first Public Information Centre (PIC 1) for this study was held on September 18, 2019, to present and gather feedback on the study background, Class EA process, Nagle Road interchange design alternatives and existing study area conditions.

Based on the findings of the evaluations, a preliminary preferred plan has been identified. **This letter is to advise you of potential impacts to your property identified in association with the future footprint of Highway 401 and Nagle Road interchange improvements.** The approximate area of your property impacted by the preliminary preferred plan is indicated in the attached plan. As noted on the preliminary plan attached, the property boundaries are subject to final legal survey.

As a directly impacted property owner, we would like to provide you with an opportunity to fully discuss the information with the project team personally, and to address any questions or comments you may have. The Town and MTO are committed to working with property owners to help to ensure that they understand the property acquisition process and their rights. **We propose to hold a virtual meeting/teleconference with you on X, January X, 2023, from X AM to X AM.**

It would be appreciated if you could kindly respond to one of the undersigned via email and/or telephone by **Tuesday, January 10, 2023** to confirm the proposed meeting time. If an alternative meeting date and/or time is preferred, please do not hesitate to let us know and a separate meeting can be arranged.

Public Information Centre 2

As indicated within the attached notice, a second and final Public Information Centre (PIC) related to this study has been scheduled as follows:

Wednesday, January 18, 2023

4:00 PM to 7:00 PM

Cobourg Community Centre

750 D'Arcy Street, Cobourg

This PIC has been arranged to present and gather feedback on the evaluation of alternatives, the preliminary preferred plan, and the preliminary assessment of the anticipated environmental impacts and mitigation measures. It would be appreciated if your comments could be received by Friday, February 17, 2023. Please refer to the attached notice for additional information.

The Town and MTO are committed to working with property owners to help to ensure that they understand the property acquisition process and their rights. Should you have any questions, please contact either one of the following:

Highway 401 Planning Study from Cobourg to Colborne, and Highway 401 Nagle Road Interchange Study

Highway 401 Planning Study

Welcome to the Highway 401 Planning Study from Cobourg to Colborne. The Ministry of Transportation, Ontario (MTO) has retained Stantec Consulting Ltd. (Stantec) to complete a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study on Highway 401 for the replacement and rehabilitation of structures, interchange modifications, future widening of the highway, and commuter parking lot expansions, from 2 km east of Nagle Road to Percy Street (approximately 18 km).

Nagle Road Interchange Study

Welcome to the Highway 401 Nagle Road Interchange Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study on Highway 401 for a new interchange near Nagle Road in the Town of Cobourg and the Township of Hamilton (GWP 4059-17-00). The interchange study is the Town of Cobourg's initiative and is being completed concurrently with the MTO's Highway 401 Planning Study from Cobourg to Colborne (GWP 4060-11-00).

News for: Nagle Road Interchange Study

2023-01-19 The exhibits for Public Information Centre 2 are now available for download. ([PDF, 20 MB](#)).

2023-01-04 A Notice of Public Information Centre (PIC) 2, for the Highway 401 Nagle Road Interchange Study ([PDF](#)) has been posted in the local newspaper and distributed to stakeholders. PIC 2 will be held in-person in a drop-in format on **Wednesday, January 18, 2023 from 4:00 PM to 7:00 PM at the Cobourg Community Centre located at 750 D'Arcy Street, Cobourg, Ontario**. The purpose of PIC 2 will be to present and gather feedback on the evaluation of alternatives, the preliminary preferred plan, and the preliminary assessment of the anticipated environmental impacts and mitigation measures. You are encouraged to participate in this study and to provide your comments to members of the study team either in-person at the PIC 2 event, or via email at comments@highway401cobourgcolborne.ca. It would be appreciated if all comments could be received by **February 17, 2023**.

2022-07-29 The project team is currently developing and evaluating alternative design concepts to identify a Preliminary Preferred Plan. Public Information Centre (PIC) 2 is anticipated to be held in December 2022, at which time the preliminary evaluation of alternatives, Preliminary Preferred Plan, potential impacts and proposed mitigation measures will be shared for public review and feedback. Additional information regarding this second and final PIC will be provided on this website as it becomes available.

In addition, the Transportation Environmental Study Report (TESR), a comprehensive report which documents the entire Class EA and Preliminary Design study and associated decision-making process, will be issued for a 30-day public review period once the study has been completed (approximately early 2023).

In the interim, if you have any questions or comments, please do not hesitate to email the study team at comments@highway401cobourgcolborne.ca

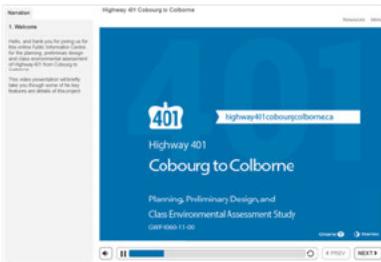

2019-09-19 The exhibits for Public Information Centre 1 are now available for download. ([PDF, 7.5MB](#))

2019-09-04 A Notice of Public Information Centre 1, for the Nagle Road Interchange Study ([PDF](#)) has been posted in local newspapers and distributed to stakeholders.

2019-02-06 A Notice of Study Commencement for the Nagle Road Interchange ([PDF](#)) has been posted in local newspapers and distributed to stakeholders. At this time the project team is gathering existing information about the study area.

NOTICE OF PUBLIC INFORMATION CENTRE 2 PRELIMINARY DESIGN AND CLASS ENVIRONMENTAL ASSESSMENT Highway 401 Nagle Road Interchange Study, GWP 4059-17-00

The Ontario Ministry of Transportation (MTO) and Town of Cobourg (Town) are undertaking a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study for a new Highway 401 interchange with Nagle Road within the Town and the Township of Hamilton. This new interchange is the Town's initiative and will support the transportation objectives set forth in the Town's Official Plan and future growth within the Cobourg East Community Secondary Plan area.

THE PROCESS

This study is a "Group B" project under the Class EA for Provincial Transportation Facilities (2000) and includes undertaking environmental and engineering investigations and seeking input from the public, local municipalities, external ministries/agencies, Indigenous communities, and businesses. Upon completion of preliminary design, a Transportation Environmental Study Report (TESR) will be prepared and made available for public comment. Notices will be published in local newspapers to advise the public of the TESR public comment period.

PUBLIC INFORMATION CENTRE 2

This notice is to announce the second Public Information Centre (PIC) for this study. The first PIC for this study was held on September 18, 2019, to present and gather feedback on the study background, Class EA process, Nagle Road interchange design alternatives and existing study area conditions. A second PIC has been arranged to present and gather feedback on the evaluation of alternatives, the preliminary preferred plan, and the preliminary assessment of the anticipated environmental impacts and mitigation measures. Members of the study team will be present to discuss the study with you and to answer any questions you may have.

This in person PIC will be held in a drop-in format and has been scheduled as follows:

Date: Wednesday, January 18, 2023

Location: Cobourg Community Centre, 750 D'Arcy Street, Cobourg, Ontario

Time: 4:00 PM to 7:00 PM

COMMENTS

You are encouraged to participate in this study and to provide your comments to members of the study team. If you wish to have your name added to the project mailing list and/or have any questions about this study, please contact:

Welcome to Public Information Centre 2

January 18, 2023

This is the second Public Information Centre for the Highway 401
Nagle Road Interchange Study

The purpose of this PIC is to present
and gather your feedback on the :

- Study background and information presented to date
- Evaluation of interchange alternatives
- Preliminary design for the Preferred Plan
- Potential environmental impacts and proposed mitigation measures

Ontario

Stantec

highway401cobourgcolborne.ca

About the Project

The Ontario Ministry of Transportation (MTO) and the Town of Cobourg have retained Stantec Consulting Ltd. to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study on Highway 401 for a new interchange near Nagle Road in the Town of Cobourg and the Township of Hamilton. The purpose of the study is to identify a Recommended Plan that addresses future transportation and planning needs in the study area. The interchange study is the Town of Cobourg's initiative.

As part of the interchange study, the existing Nagle Road bridge is also being assessed. The Nagle Road bridge was constructed in 1959. It is a concrete structure and carries two lanes of traffic over Highway 401. Due to its age, the bridge is approaching the end of its planned service life and will need to be rehabilitated or replaced. Ultimately, the bridge will need to accommodate the future Highway 401 eight lane footprint and a new possible interchange (depending on the preferred plan selected).

This study will include reviewing existing conditions, developing and evaluating interchange alternatives, identifying a preferred plan, and developing environmental protection/mitigation measures. At the completion of the study, a recommended plan will be confirmed and designated (i.e. protected).

Environmental Assessment Process

This study is being carried out under the requirements of the Class Environmental Assessment for Provincial Transportation Facilities (2000), which has been approved under the Ontario Environmental Assessment Act for provincial transportation projects of a defined scope and magnitude.

The MTO Class EA process is an approved process for highway planning, design, and construction projects. The study is following a Group 'B' process which is completed for major improvements to existing provincial transportation facilities.

At the end of the study, a Transportation Environmental Study Report (TESR) will be prepared and made available for public comment.

Class Environmental Assessment Process for Group 'B' Projects

Ongoing Transportation
Needs Assessment

Ongoing Public Consultation

Need Identified

Preliminary Design

Data collection

Review available background information and conduct field investigations as required to identify existing conditions in the study area

Generate & evaluate

Develop preliminary design alternatives to address structural needs, improve the highway safety and operations, and consider potential impacts to the existing natural, social, and cultural environment to identify a preferred plan

Select

Identify the preferred plan and mitigation measures to address potential impacts

Refine

Complete preliminary design of the preferred plan including a potential implementation strategy

Report

Document the process leading to the preferred plan

Clearance

The Class EA requirements are met and the project is cleared to proceed to detail design

Public Information Centre 1—Summary

Purpose

Public Information Centre was held on September 18, 2019 to present and gather feedback on the:

- Project background and process being followed;
- Nagle Road interchange alternatives; and
- Existing study area conditions.

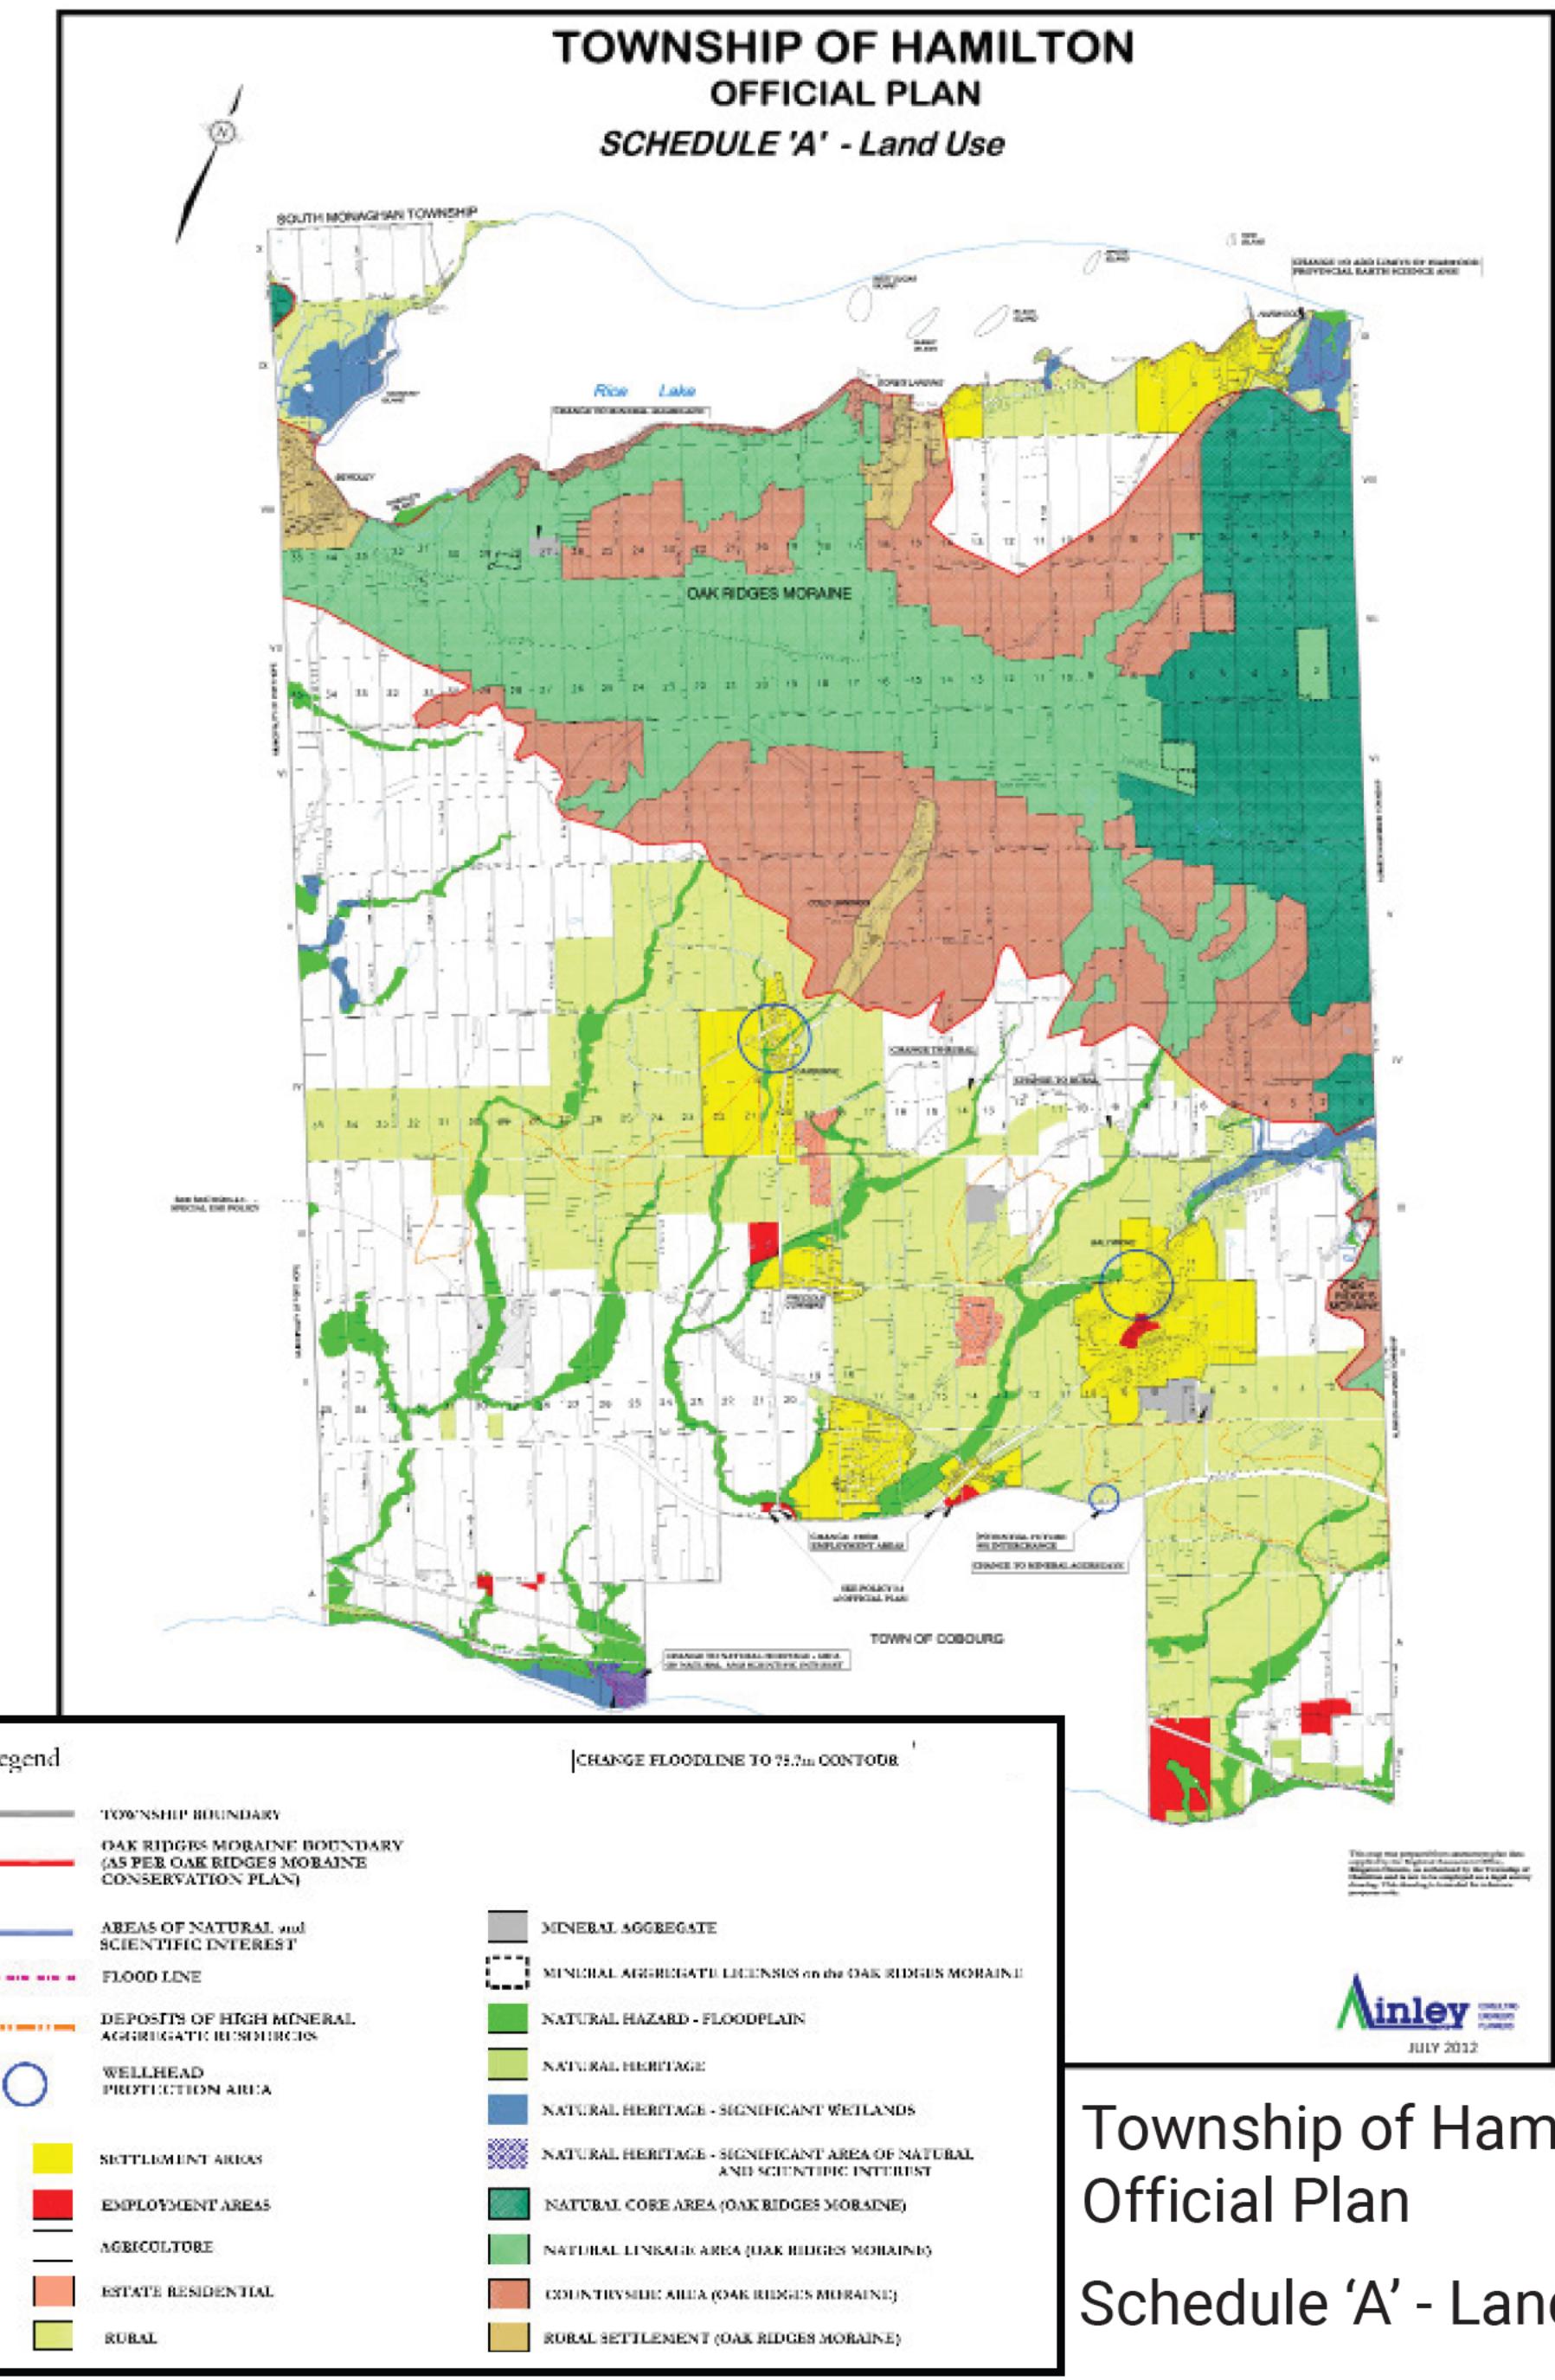

What did we hear?

- The bridge is a cycling route and should be bike friendly
- Protect agricultural land
- Avoid private property impacts
- Improve safety for school children (e.g., bus stops and shoulders)
- Accommodate pedestrians (e.g., streetlights and sidewalks)
- Avoid increases in traffic noise
- Avoid impacts to surface and groundwater
- Potential increases in traffic and/or large trucks within the residential area is a concern
- Potential impacts to fish populations and terrestrial species is a concern
- The Township of Hamilton and its residences need to be consulted further

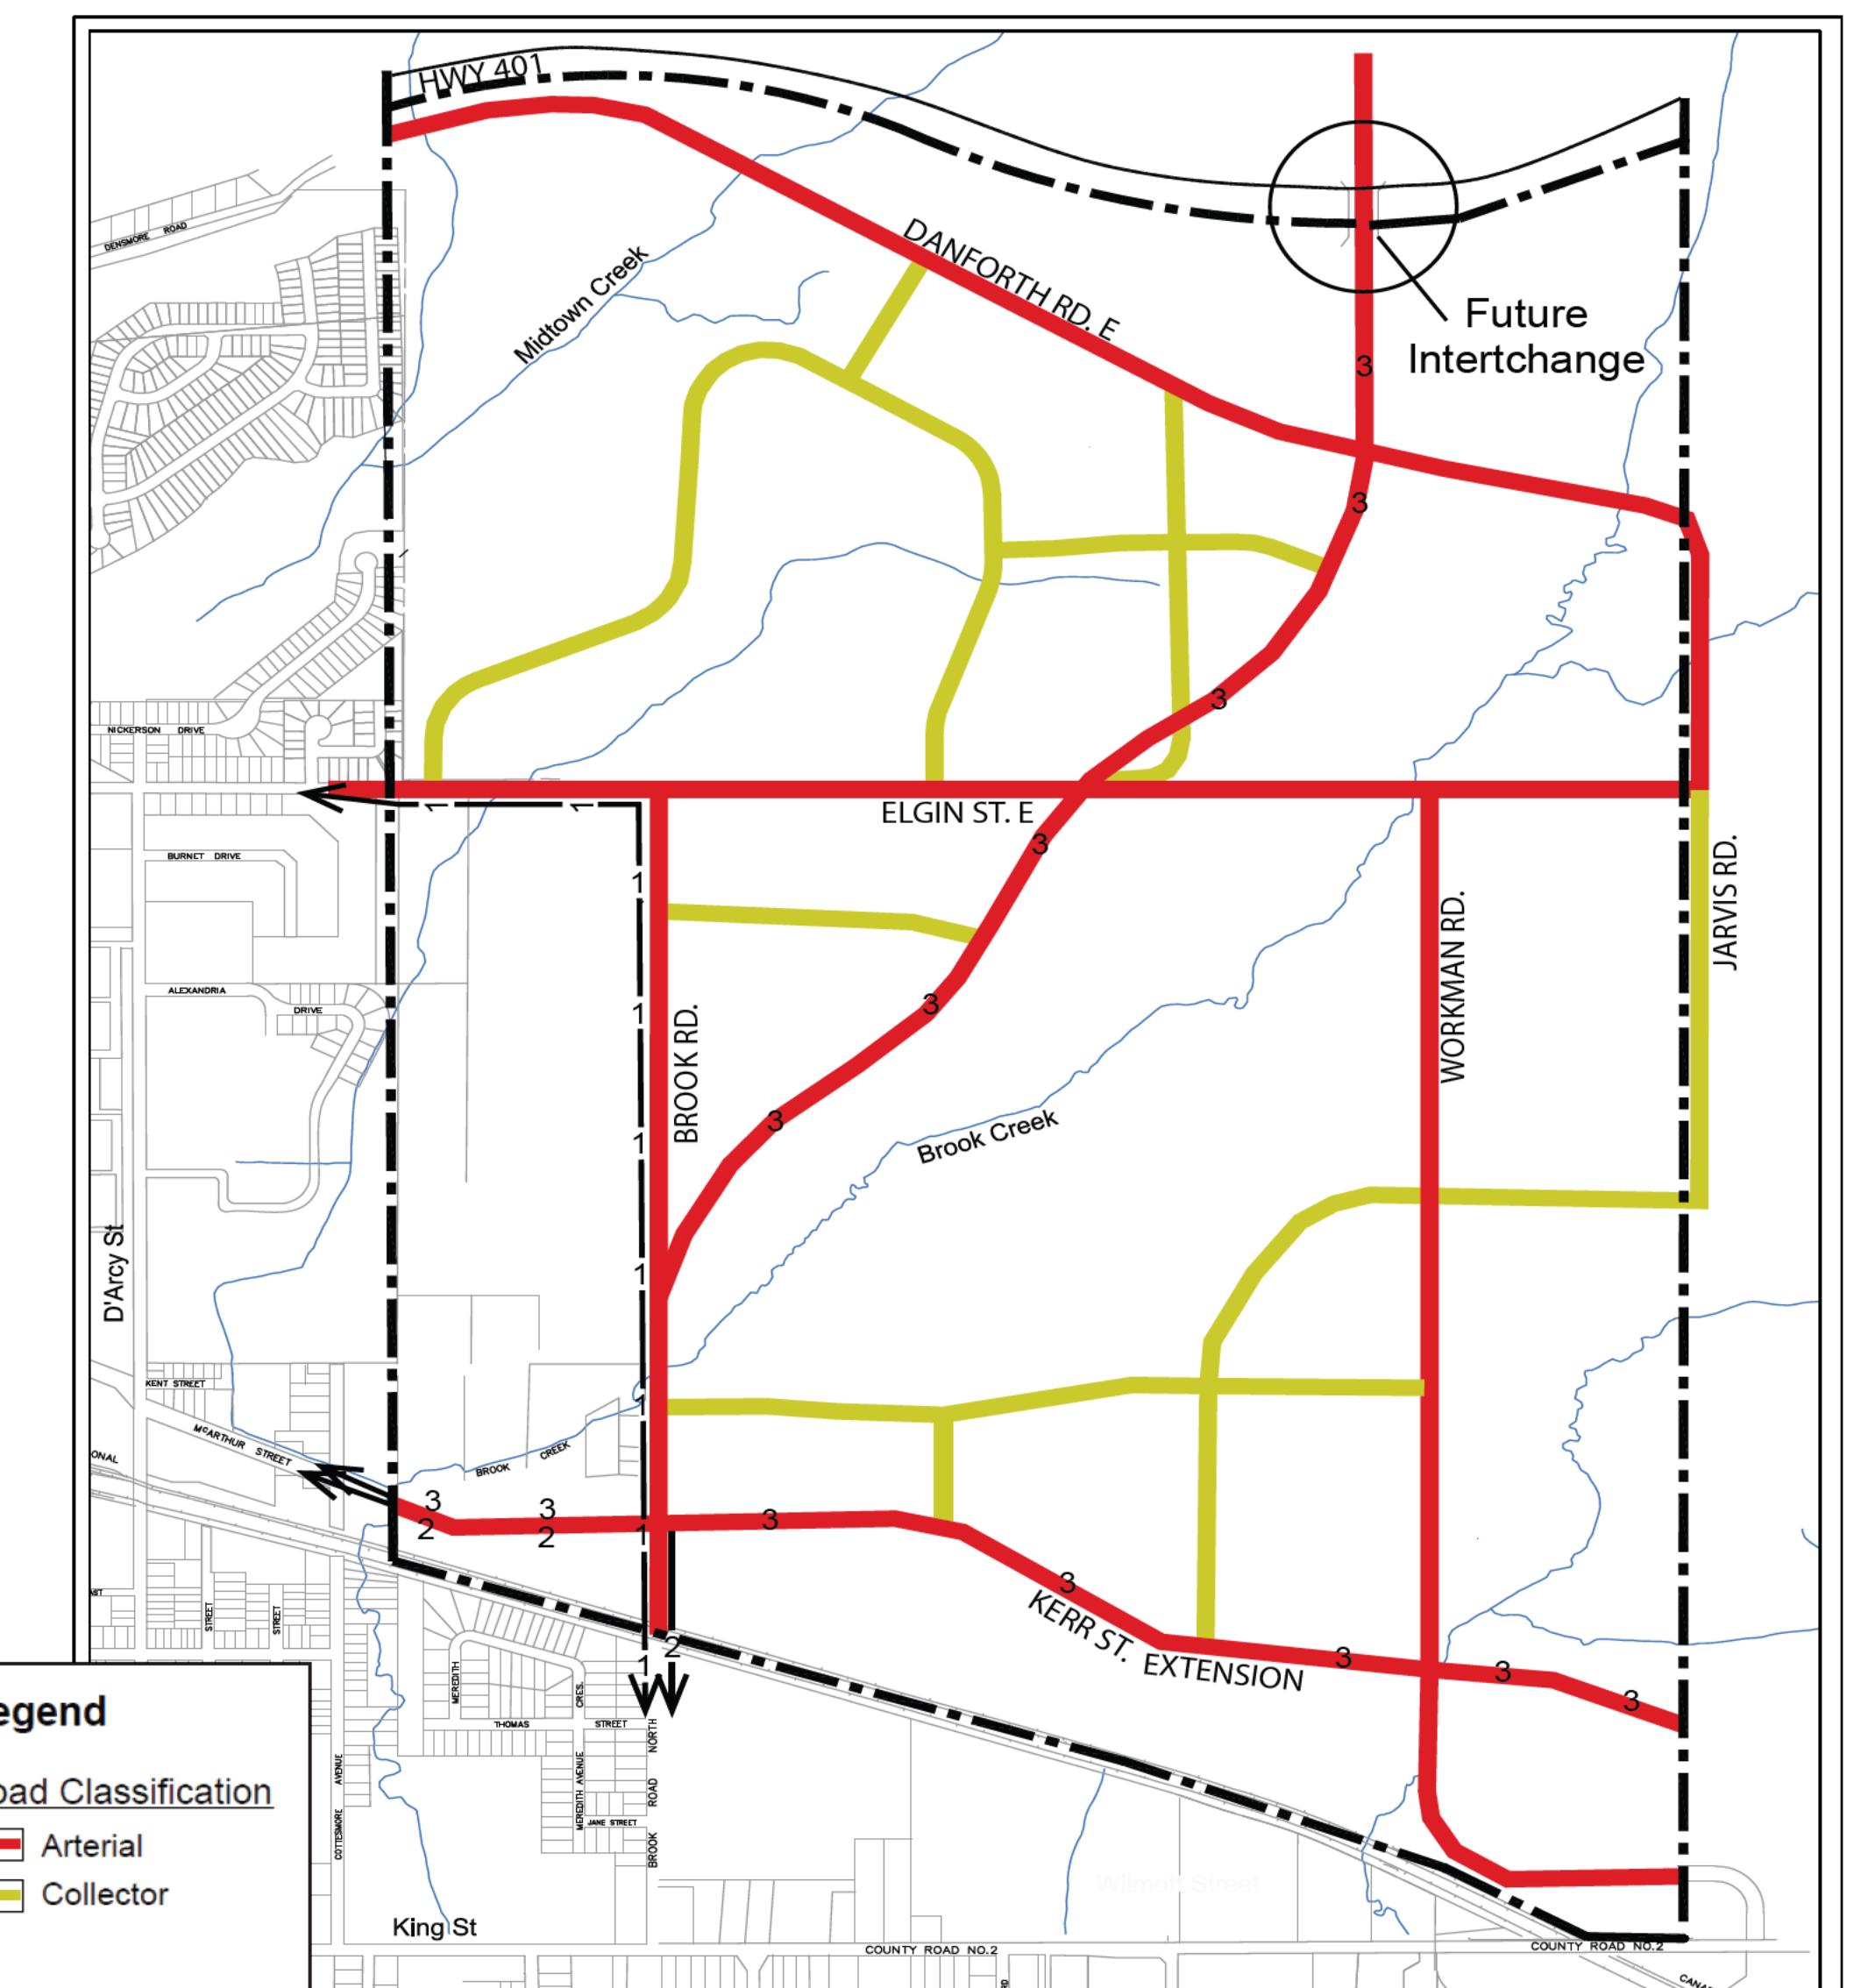

These comments were considered during the evaluation of alternatives.

Study Background

- The need for an interchange at Nagle Road/Highway 401 was identified within the Cobourg East Community Secondary Plan (approved by the Town of Cobourg Council in 2005).
- The proposed interchange supports the transportation objectives identified within the Town of Cobourg Official Plan.
- A 'potential future 401 interchange' was identified at Nagle Road as part of the Township of Hamilton's Official Plan.
- This is a long-range planning study. The Recommended Plan for the Nagle Road interchange will support future planning activities within the Cobourg East Community Secondary Plan Area.
- The timing of construction of the interchange ramps is dependent on the development of the Cobourg East community (approx. 20-30 years).
- The Nagle Road bridge over Highway 401 may be replaced in advance of the need for the proposed interchange.
- Upon study completion, additional studies may be carried out to confirm future municipal road network improvement needs.

Township of Hamilton
Official Plan
Schedule 'A' - Land Use

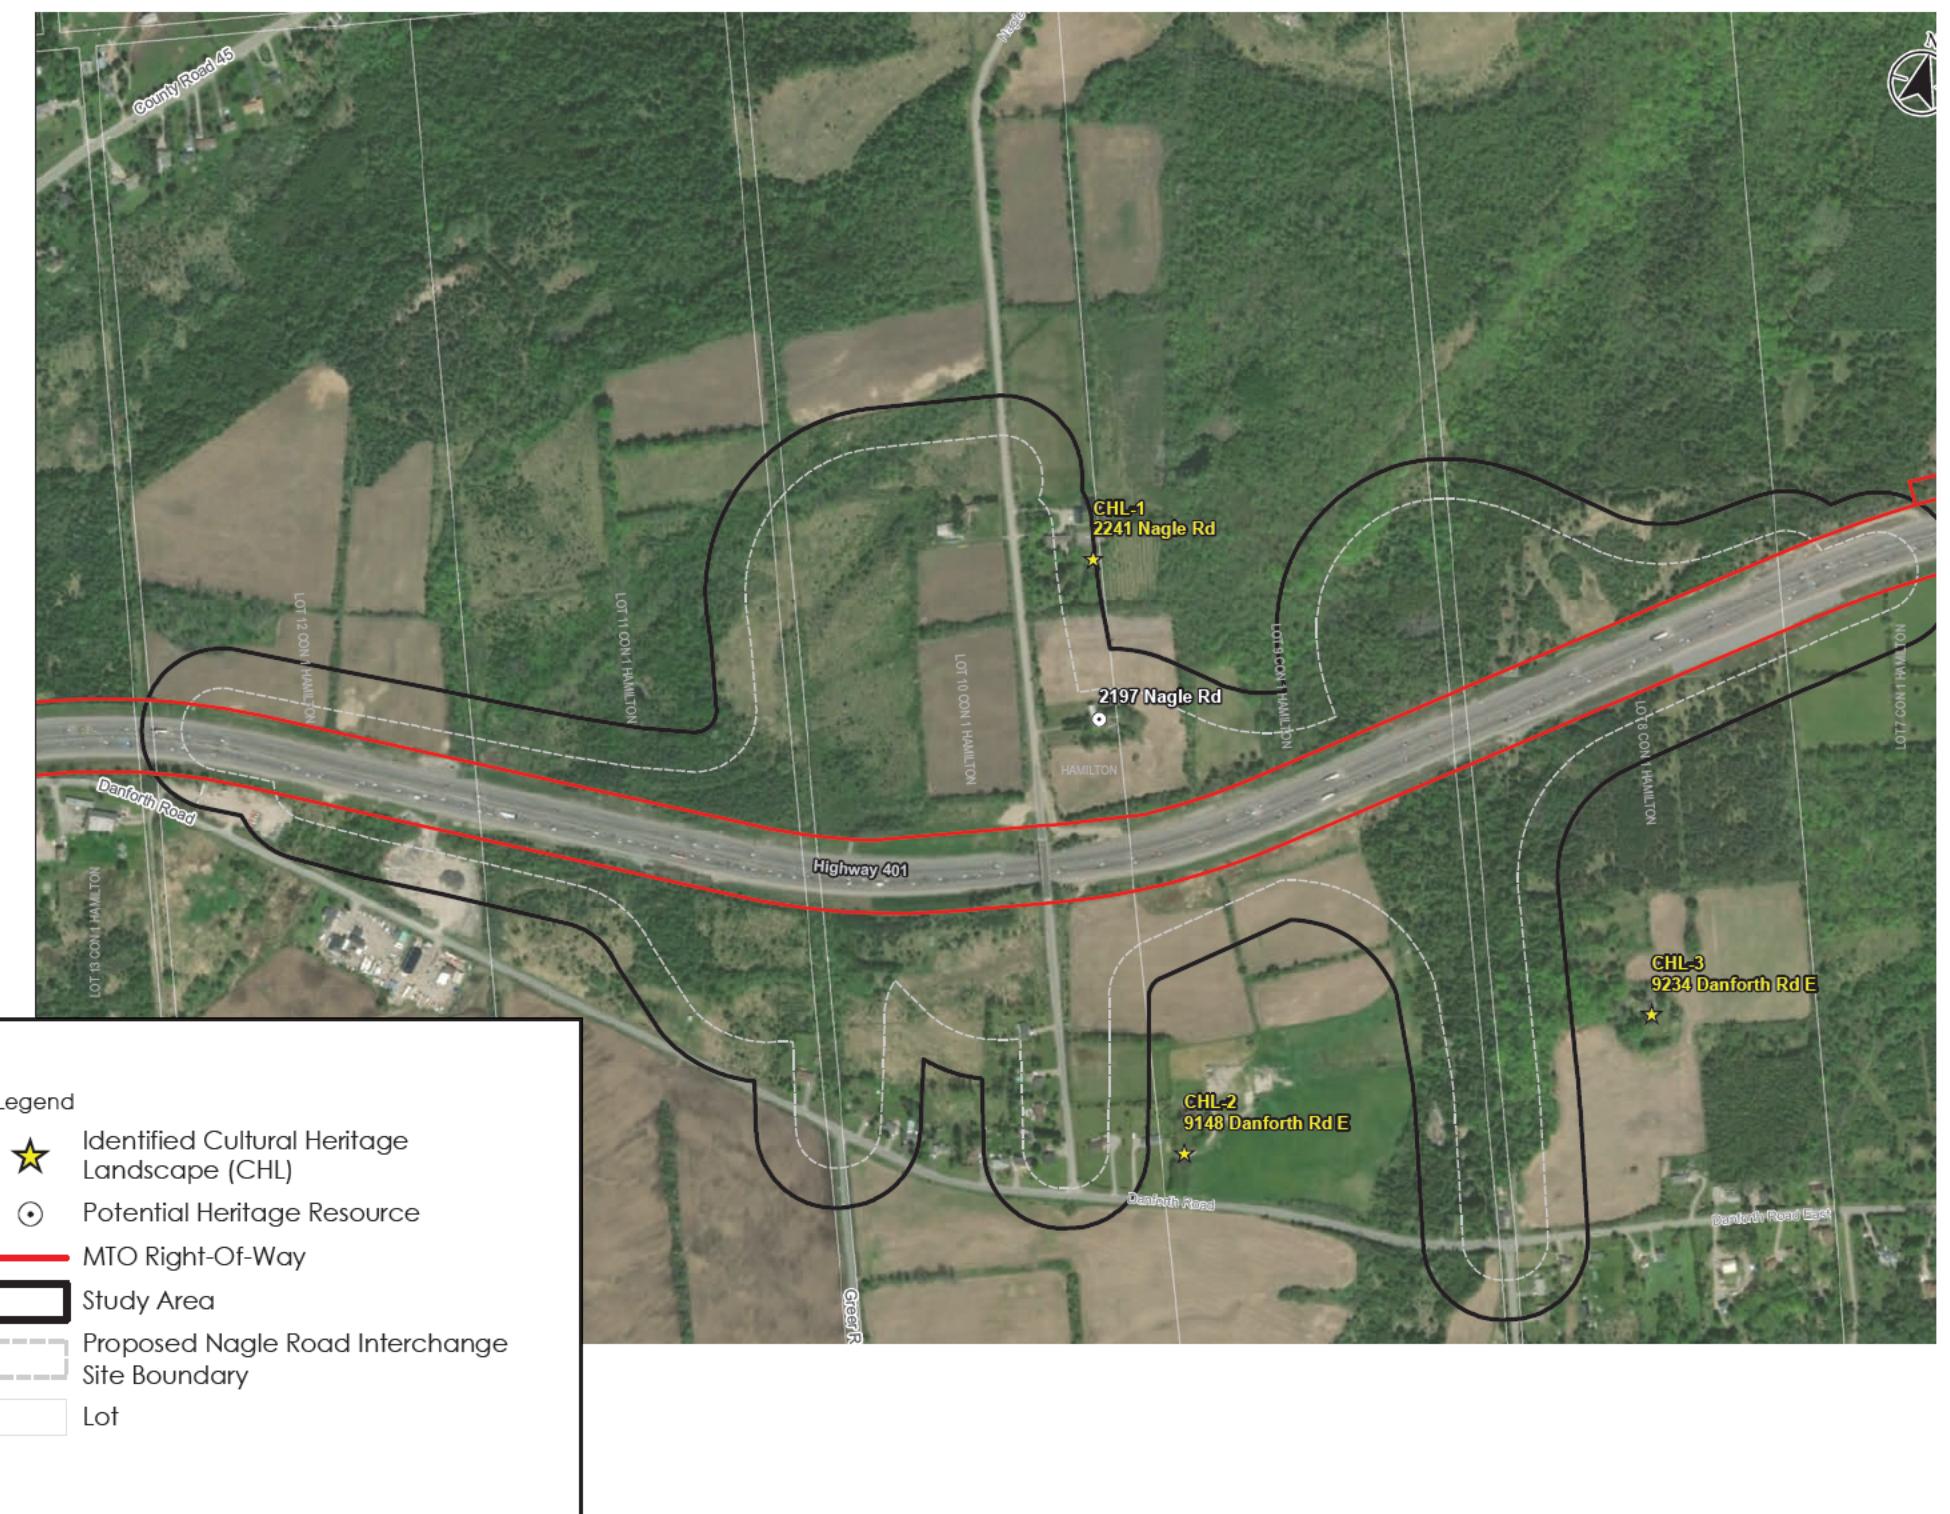

Existing Environment

Cultural and natural heritage investigations have been carried out as part of this study, the findings of which are documented within cultural heritage, archaeological and natural heritage reports, and will be documented within the Transportation Environmental Study Report.

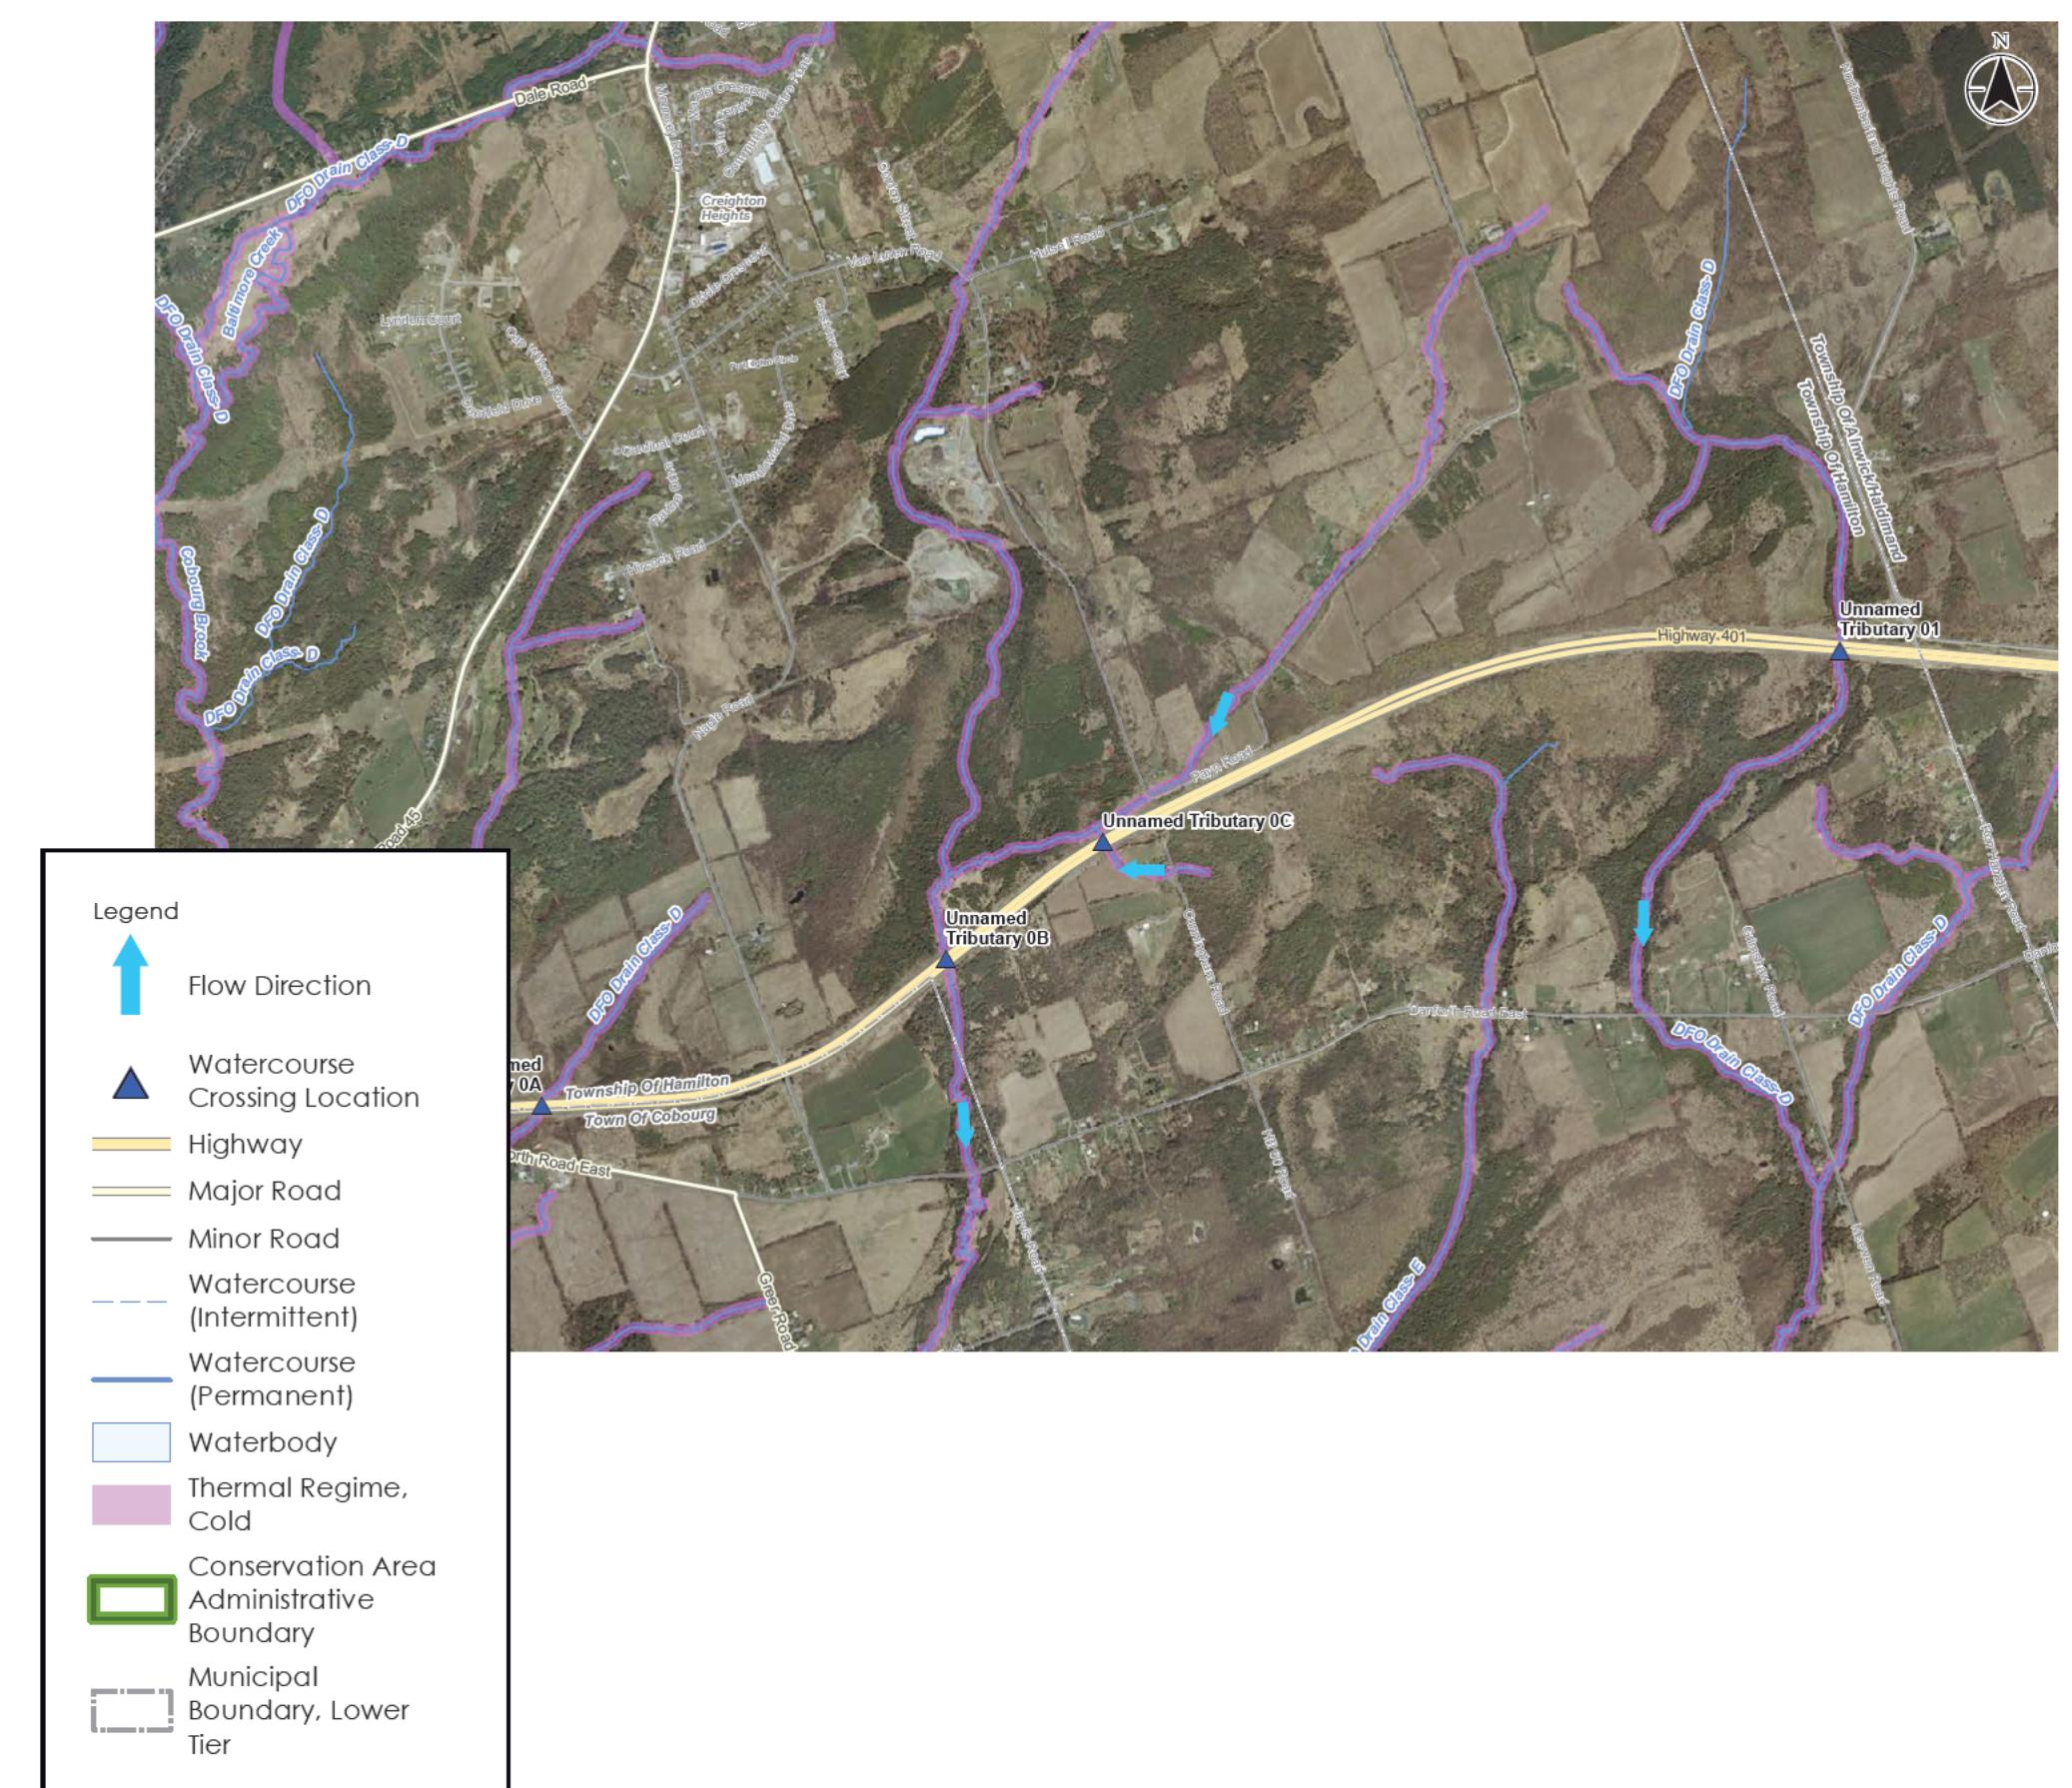

Cultural Heritage

- The potential presence of cultural heritage features within the study area was assessed in accordance with Provincial guidelines
- Construction of Highway 401 in the study area took place in the 1950s-1960s
- The existing Nagle Road bridge was constructed in the 1950s
- It is a common structure, built with typical materials, and therefore does not have any cultural heritage value or interest
- The surrounding landscape generally consists of agricultural fields, fallow fields, woodlots, and rural residences
- Four potential heritage properties are located within the study area

Natural Heritage

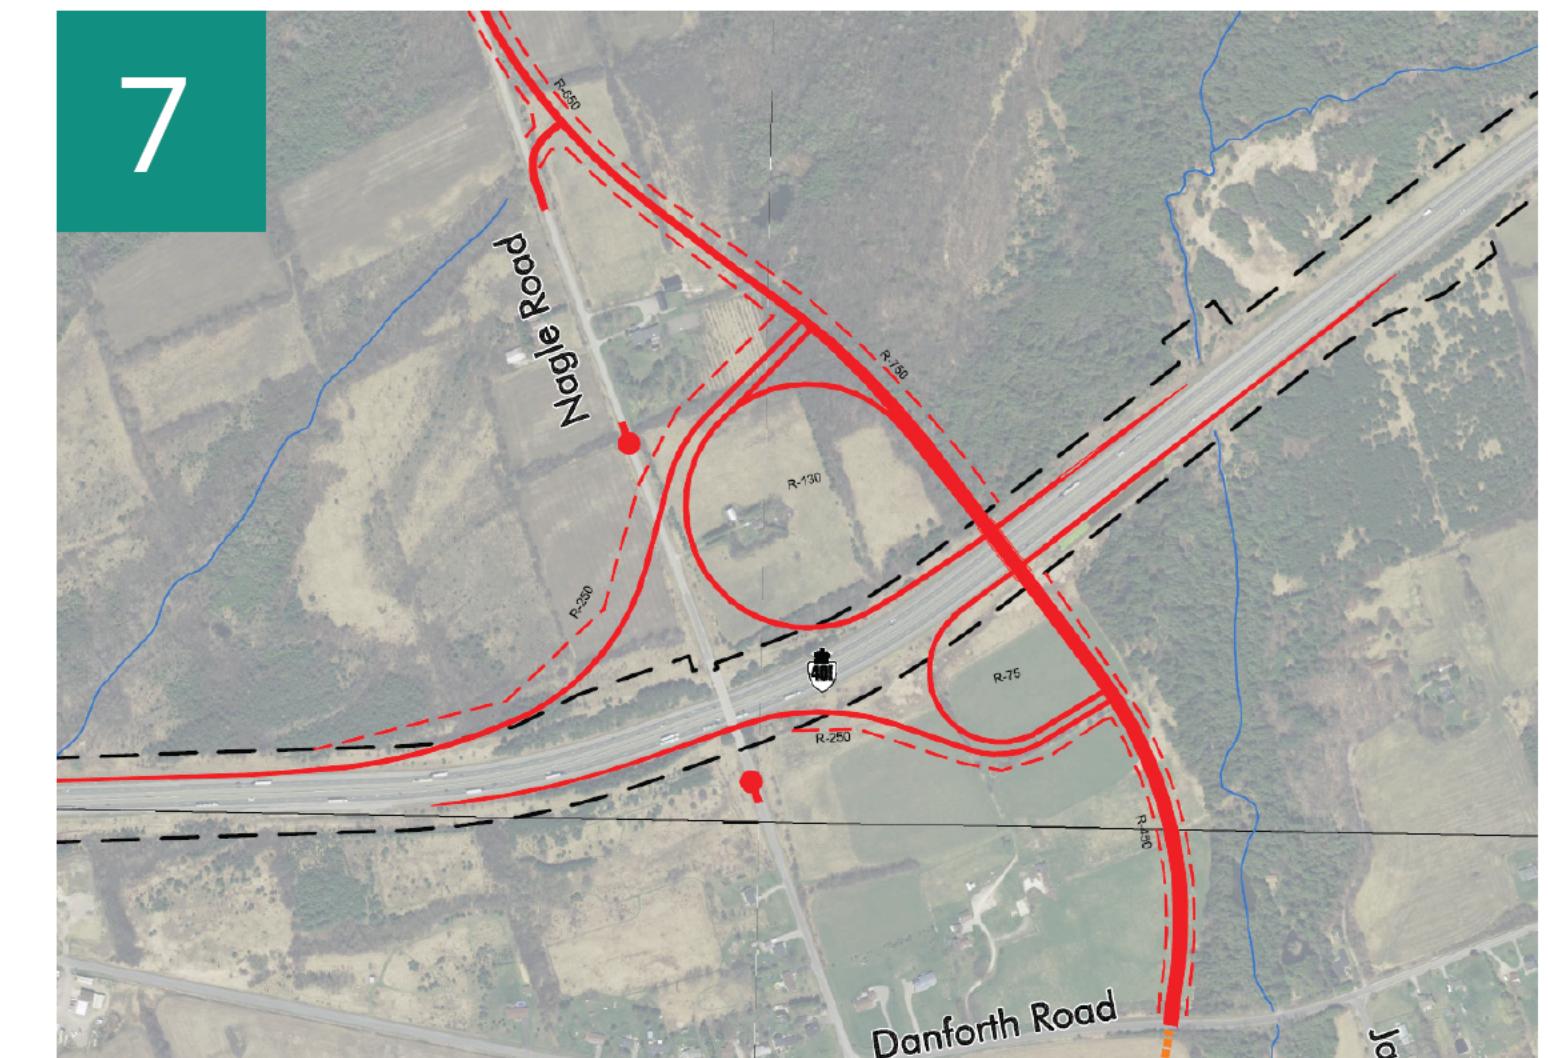

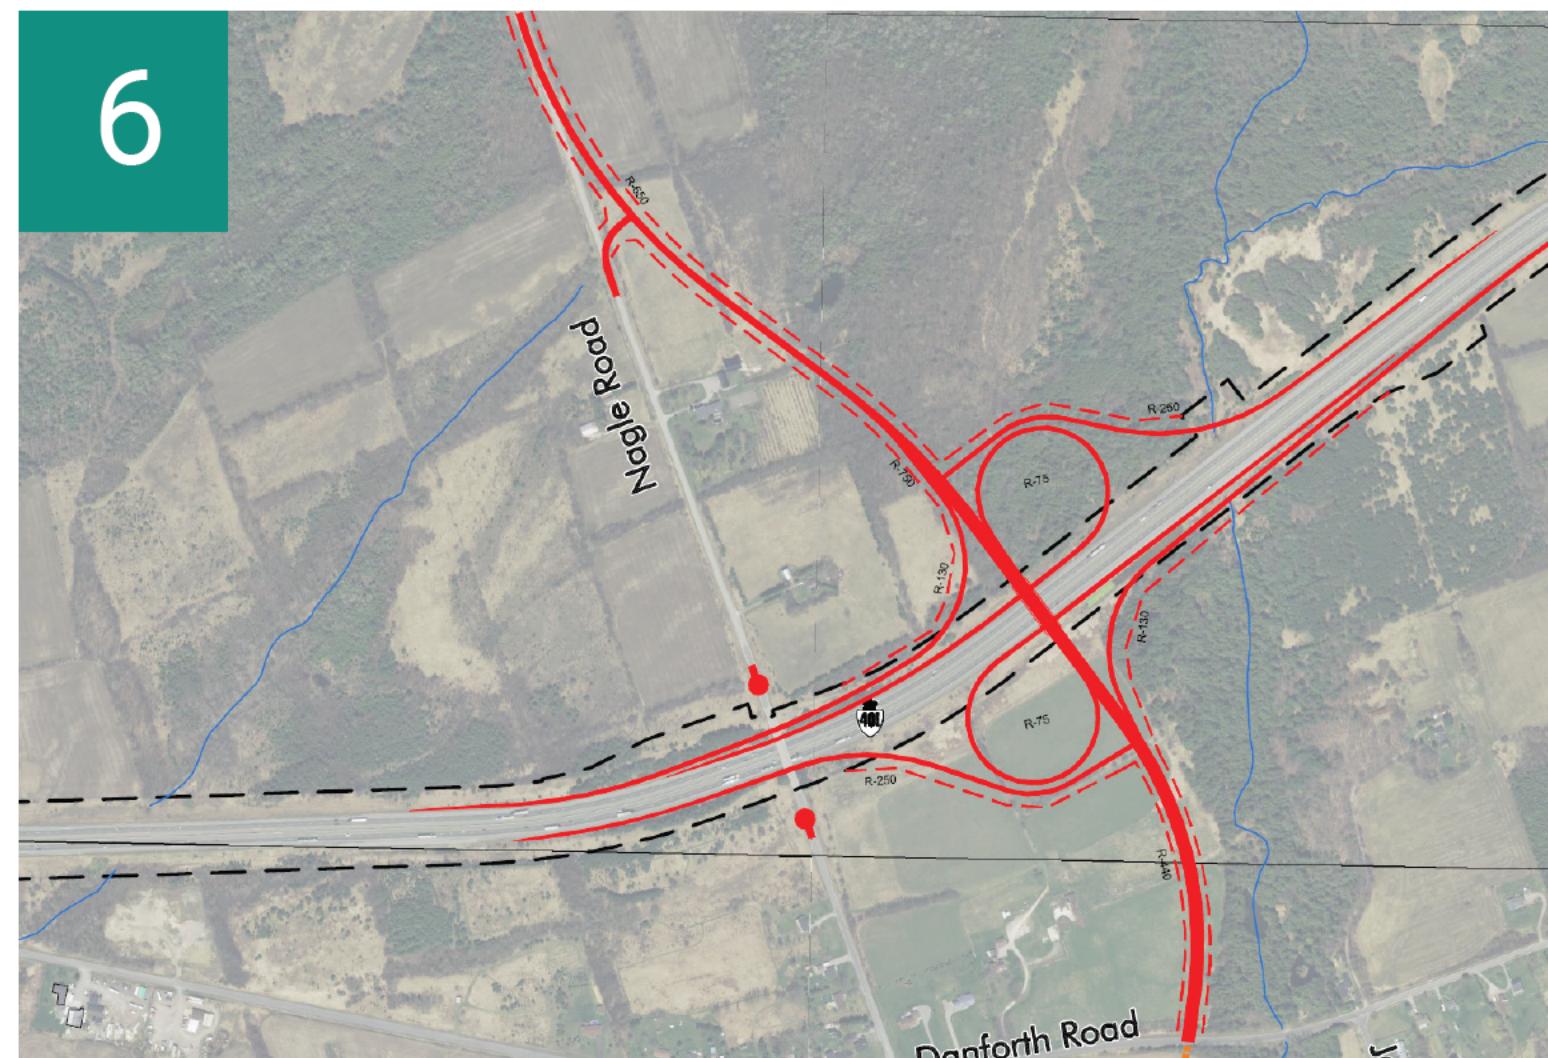

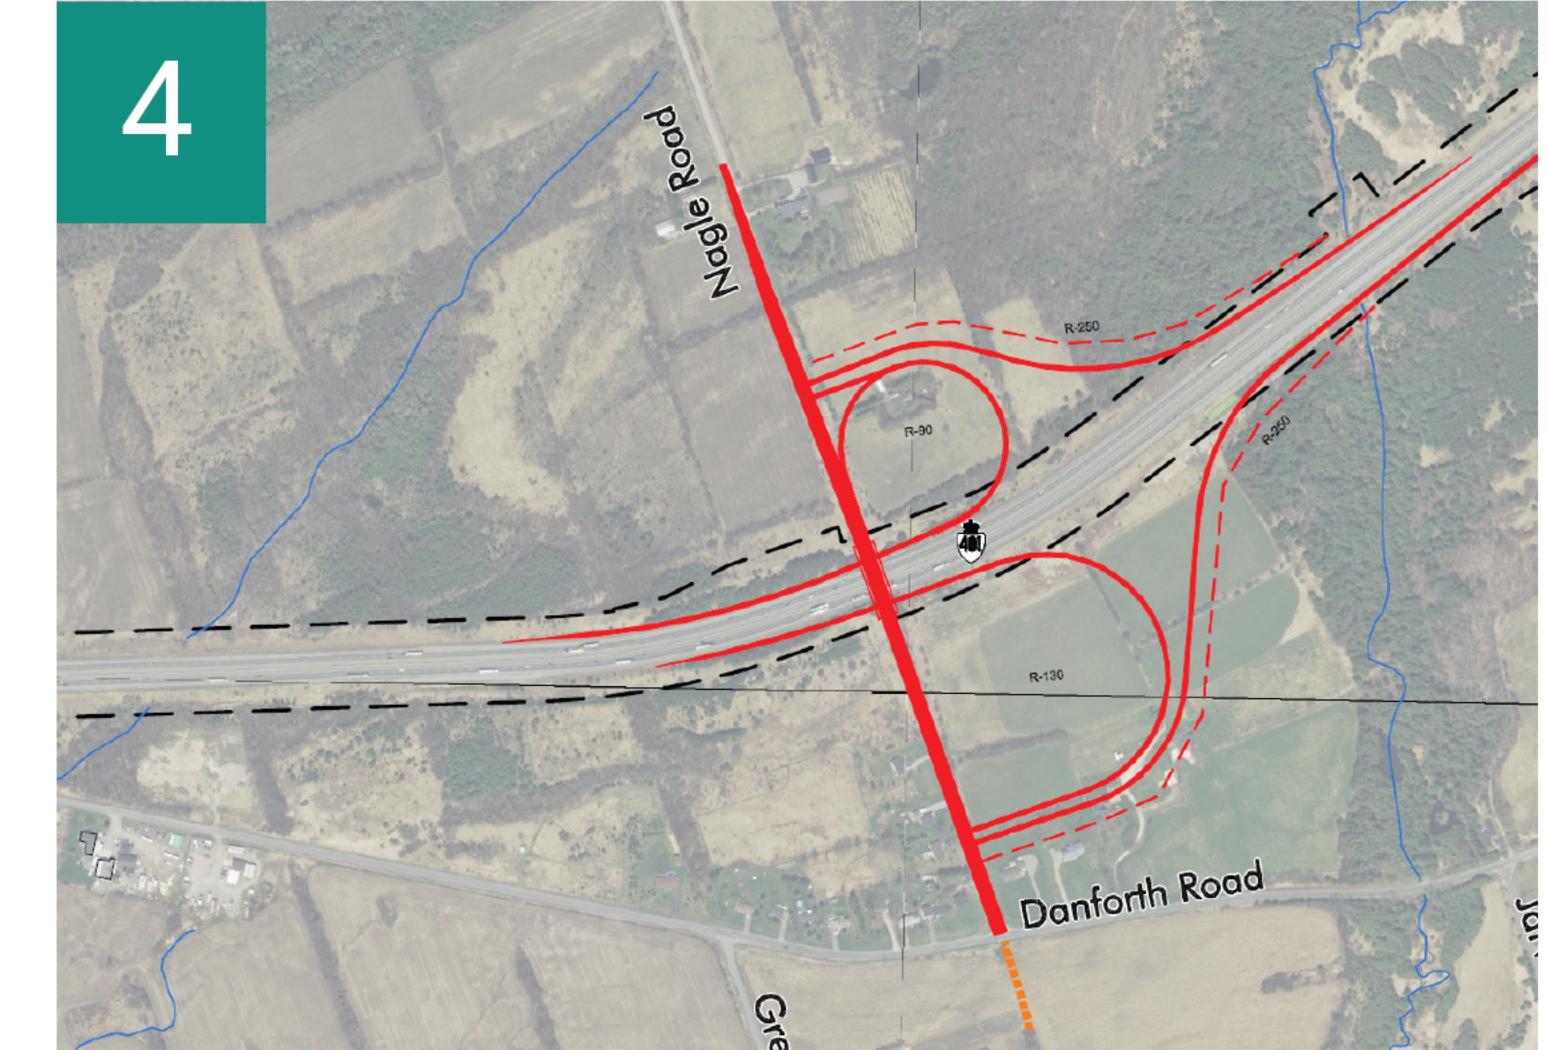

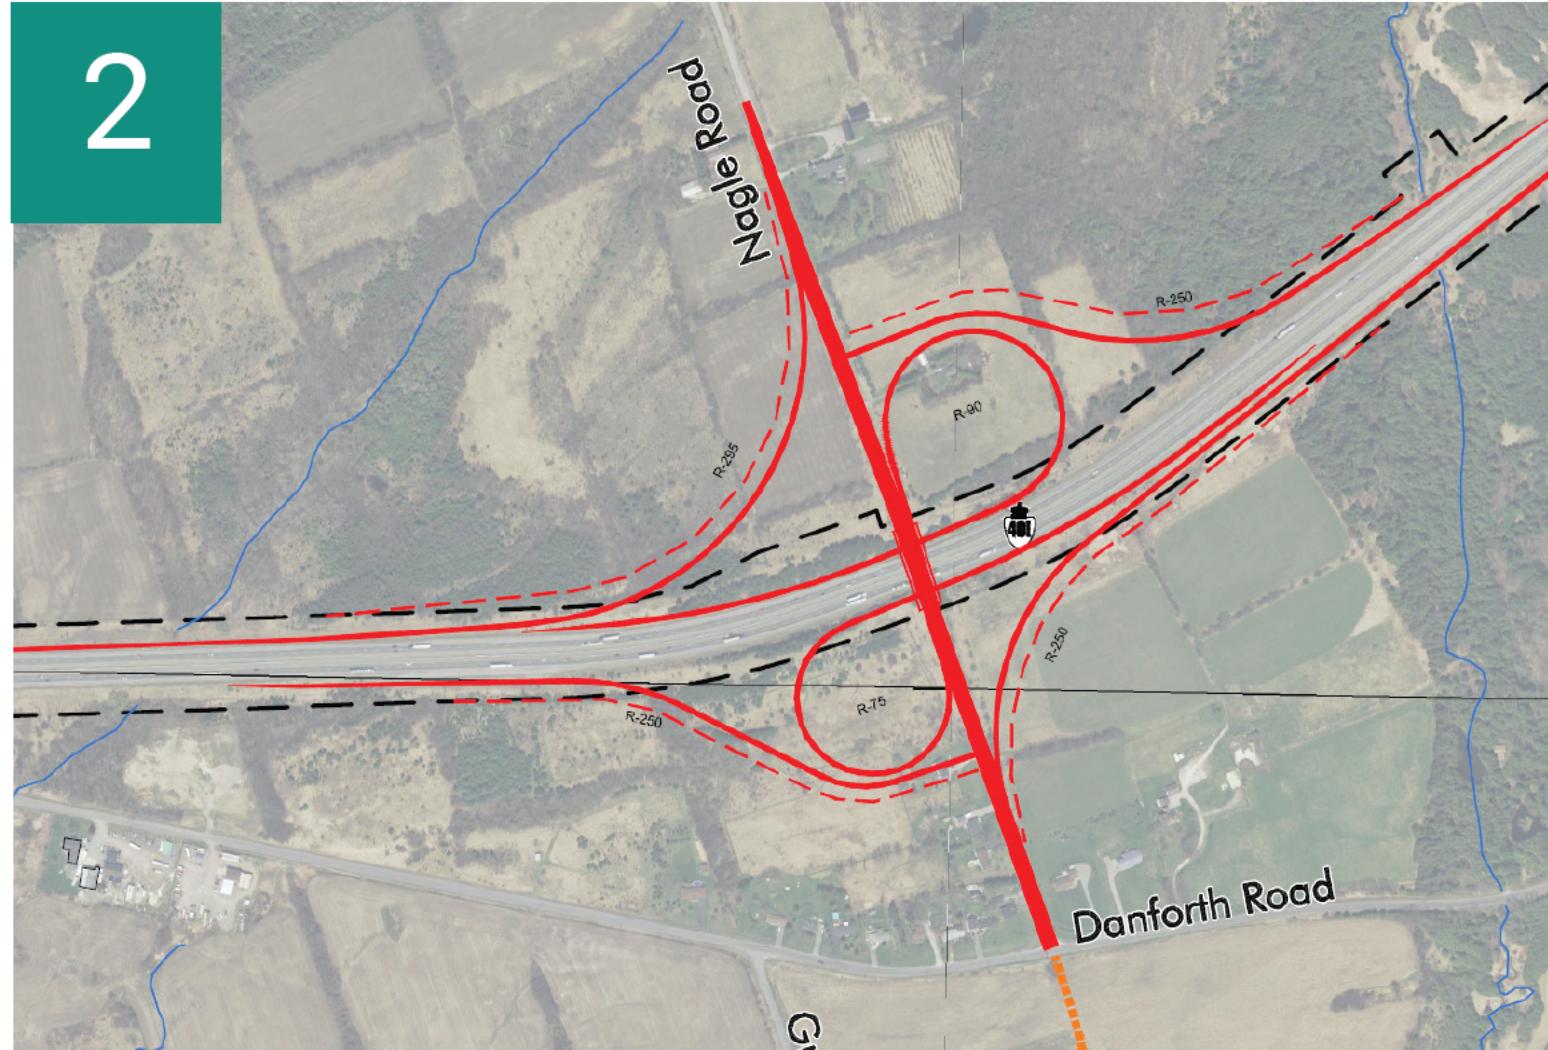

- Natural heritage features within the study area were characterized through field surveys and consultation with local and provincial authorities
- Significant Wildlife Habitat is present in the study area
- Terrestrial species at risk may be present in the study area
- Midtown Creek East and Brook Creek West are located within the east and west portions of the study area, respectively
- These are coldwater creeks that support fish/fish habitat
- No aquatic species at risk have been recorded in the study area

Evaluation Of Interchange Alternatives

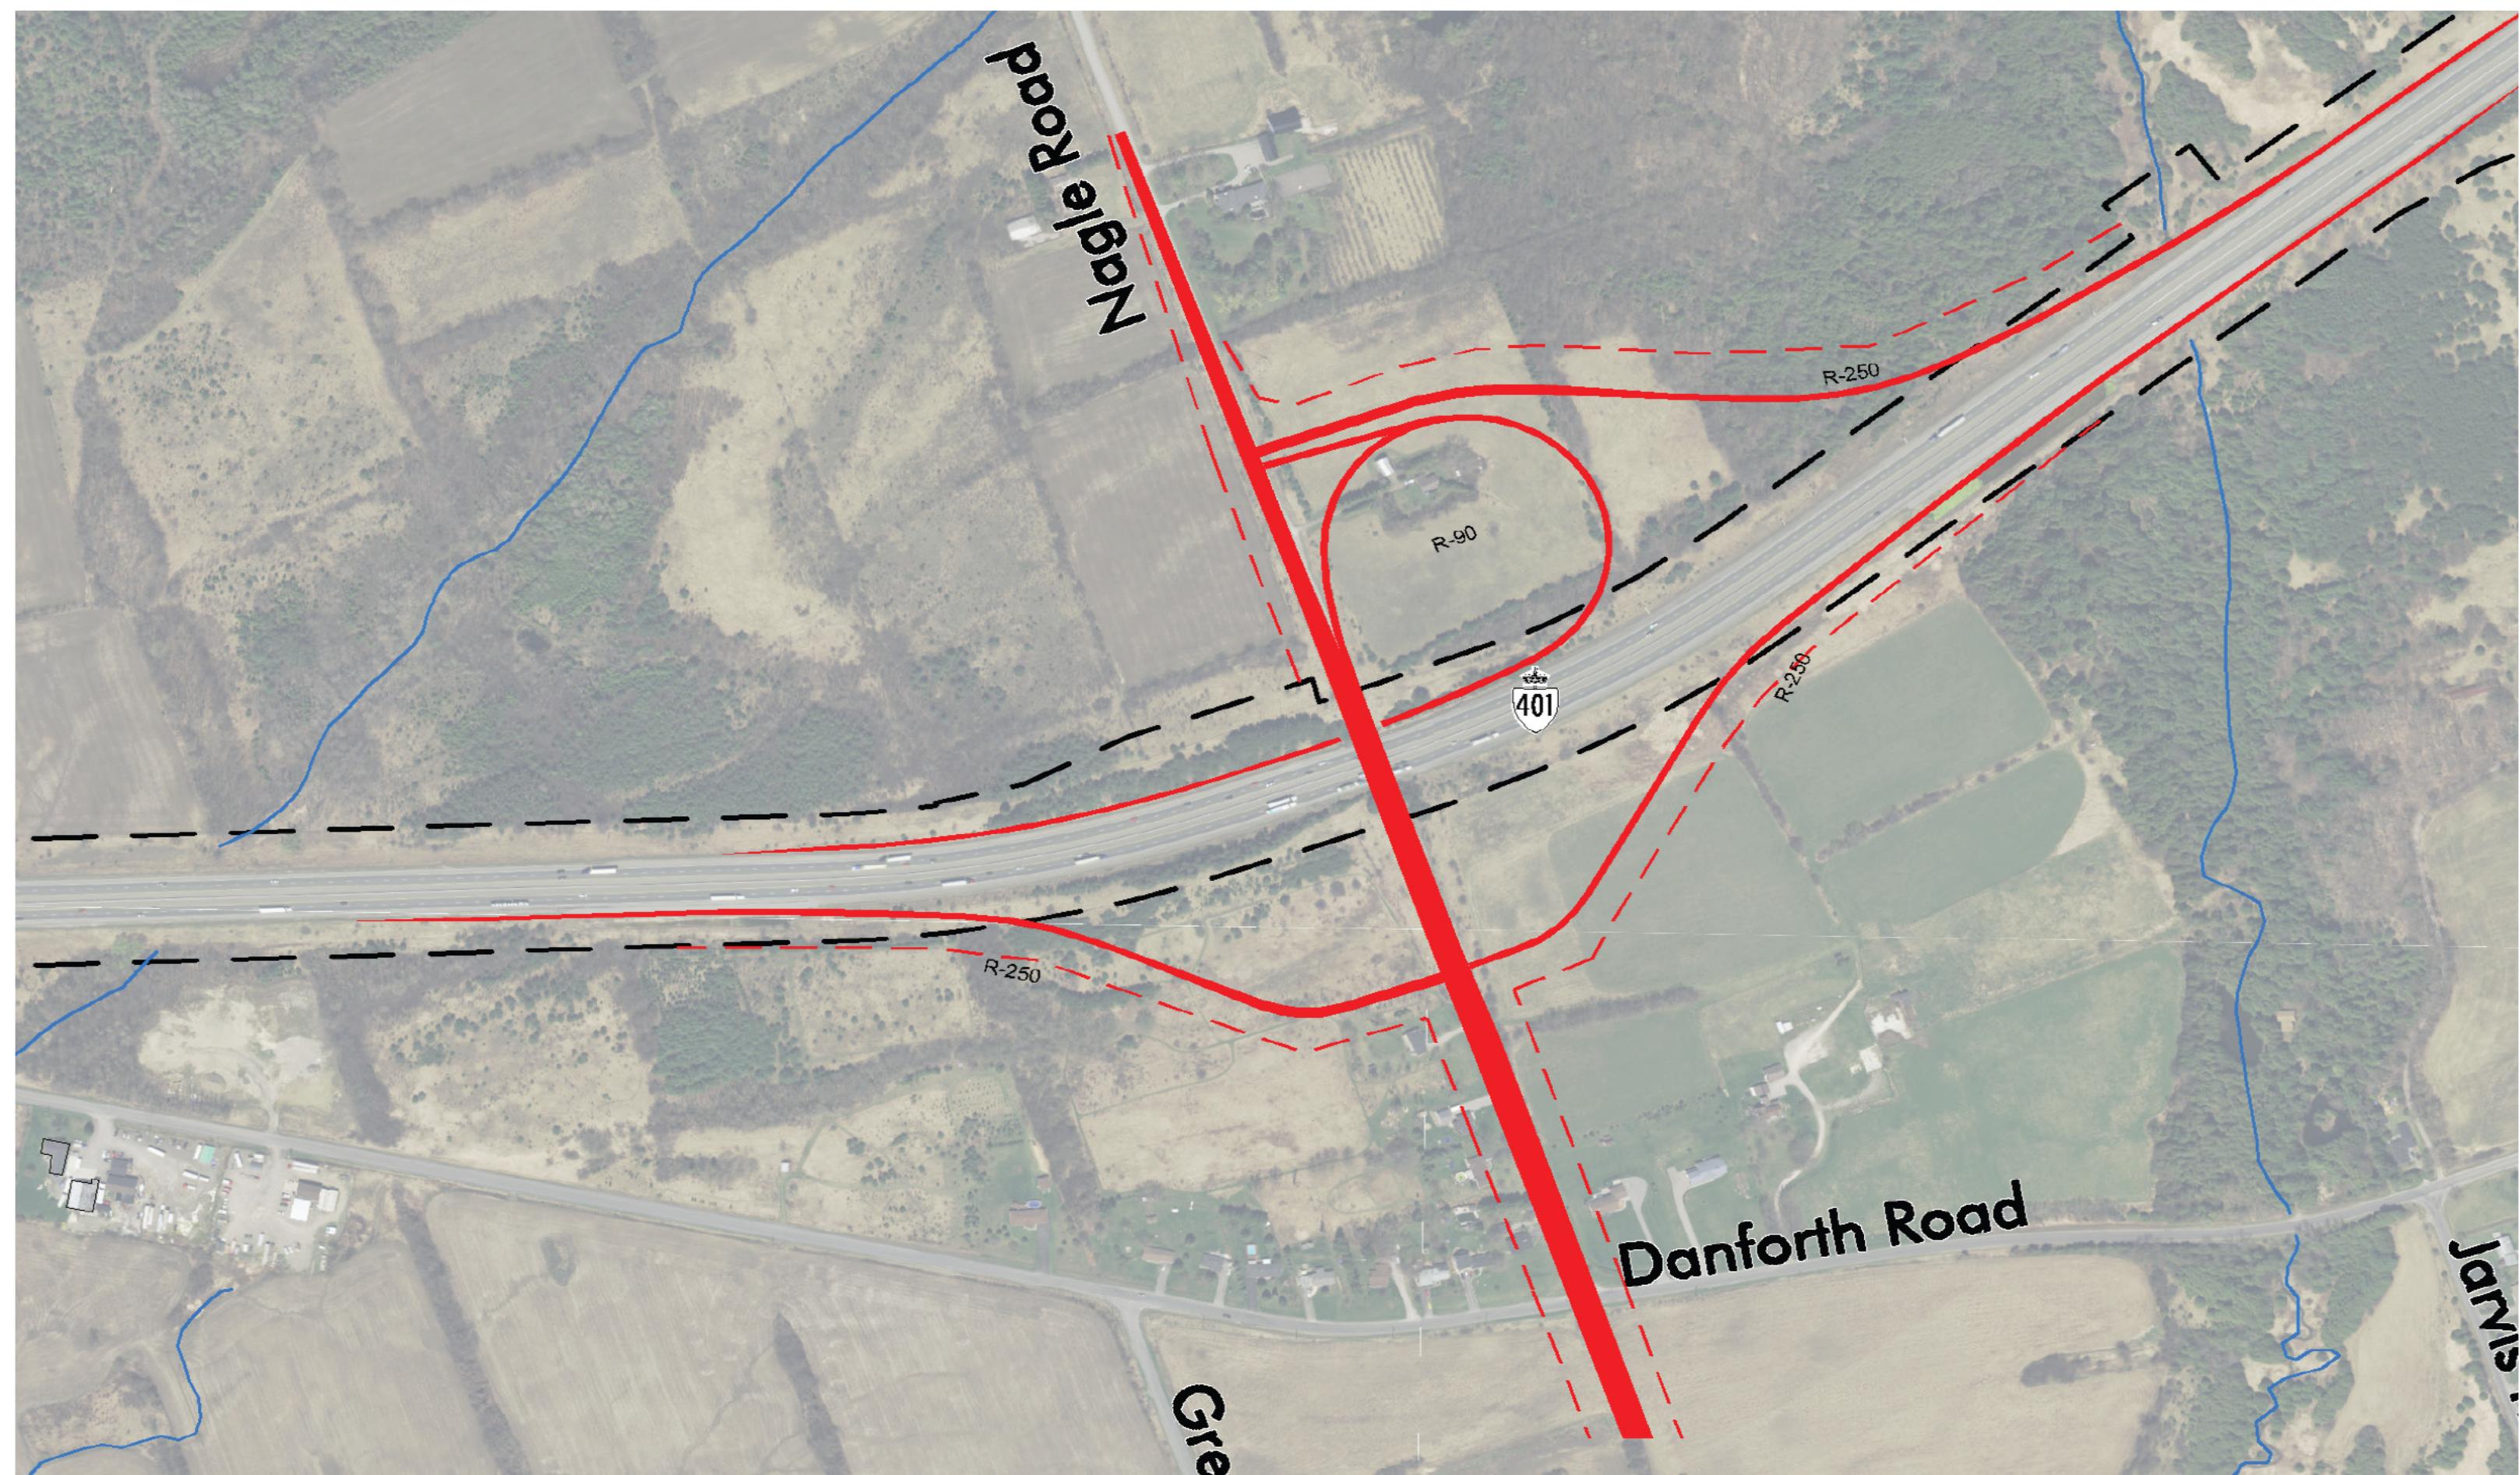

Interchange Alternatives

A Long List of 8 Interchange Alternatives were assessed and presented at PIC 1. Based on the results of screening assessment, the following Short List of Interchange Alternatives were carried forward for further evaluation:

Refinement to Short List of Interchange Alternatives:

Following PIC 1, a hybrid interchange alternative (Parclo A2/Diamond) was developed to minimize initial property impacts on the south side of the interchange and to provide implementation flexibility to accommodate the adjacent development timing. This alternative was also carried forward for more detailed evaluation.

A copy of the information presented at PIC 1 are available for review on the resource table

Evaluation criteria

Engineering

Traffic Operations

- ... consider projected future traffic from the Cobourg East Community Secondary Plan
- ... consider Level of Service (LOS) on Highway 401
- ... consider traffic flow and operations, including local access and out-of-way travel

Geometrics & Safety

- ... consider design standards for provincial highways and interchanges
- ... consider potential for collisions on Highway 401
- ... consider pedestrian and cyclists accommodations

Constructability

- ... consider construction techniques
- ... consider geotechnical and foundation conditions

Utilities

- ... consider impacts to utilities

Cost

- ... consider total cost including utility relocations and property acquisition

Community

Property

- ... consider impacts to private property

Noise & Air Quality

- ... consider noise impacts at Noise Sensitive Arenas (NSAs)
- ... consider impacts to air quality

Land Use

- ... consider impacts to sensitive land uses
- ... consider existing and future development plans

Built & Cultural Heritage

- ... consider impacts to existing cultural and built heritage features within the study area

Archaeology

- ... consider impact on archaeological resources
- ... consider impacts on areas of archaeological potential

Contamination

- ... consider impact on potentially contaminated land

Environment

Terrestrial Ecosystem

- ... consider impacts on wildlife habitat
- ... consider impacts on significant trees or vegetation

Fish & Fish Habitat

- ... consider impacts to creeks and water bodies
- ... consider impacts to fish and fish habitat

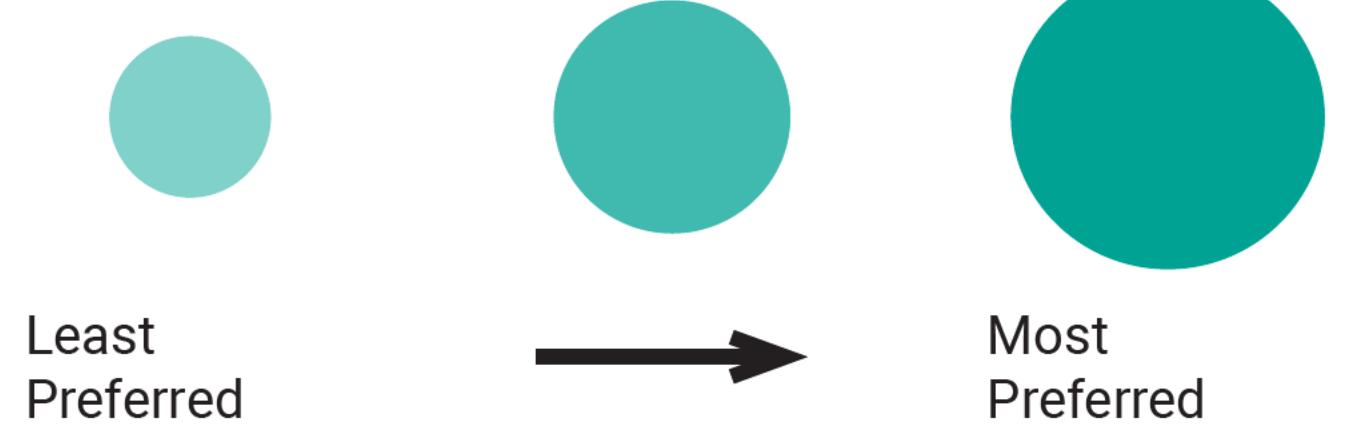

Species of Conservation Concern

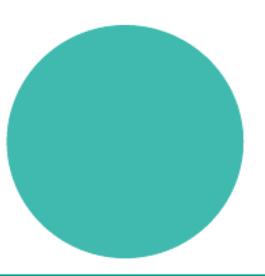

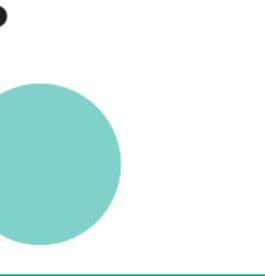

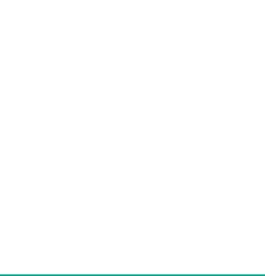

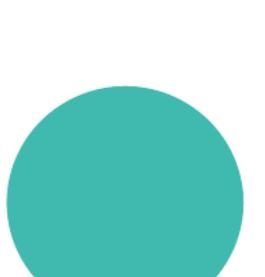

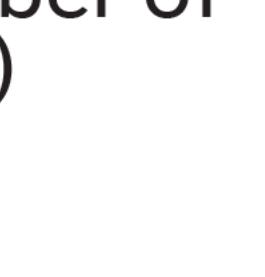

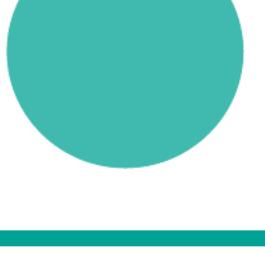

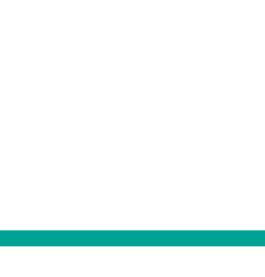

- ... consider impacts to Species-at-Risk or habitat associated with Species-at-Risk

Environmentally Sensitive Areas, Designated Areas

- ... consider impacts to the Brook Creek Environmental Constraint Area
- ... consider impacts to Sourcewater Protection Areas

Evaluation Of Interchange Alternatives

- PROPERTY REQUIRED - Phase 2
- PROPERTY REQUIRED - Phase 3
- X PROPERTY ACQUISITION - Phase 2
-  Cobourg East Community Secondary Plan designates this area as "Business Park"

The Preferred Plan was selected because...

1. It maintains the existing alignment of Nagle Road
2. The interchange configuration provides sufficient capacity and Level of Service to accommodate the anticipated traffic demands generated from the planned Cobourg East Community development
3. The bridge can be replaced in advance of the interchange (if the bridge replacement is required before the development proceeds)
4. The interchange ramps can be constructed in phases to accommodate development as required
5. It impacts less private property and agricultural land compared to the alternatives located east of Nagle Road
6. It impacts a smaller area of wildlife habitat compared to the alternatives located east of Nagle Road
7. It avoids the known Environmental Protection Areas
8. It requires the fewest number of watercourse crossings (1)
9. It has a lower construction cost compared to other alternatives

Potential Impacts and Mitigation Measures

Environmental Factor	Proposed Mitigation Measure
Fish and Fish Habitat	Sediment and erosion control measures will be designed and installed, prior to construction.
Trees/Vegetation	Vegetation and tree removals will be minimized to the extent possible.
Wildlife/Habitat	Opportunities to enhance wildlife connectivity and reduce risks associated with the highway will be reviewed during detail design. Targeted species surveys will be carried out for species that have the potential to be present based on the availability of suitable habitat.
Cultural Heritage	A Heritage Impact Assessment will be completed to confirm impacts and identify appropriate mitigation measures, if required. Additional Archaeological Assessment activities will be carried out during detail design.
Landscape/Views	Visual screening measures will be explored during detailed design, in consultation with affected property owners. MTO will continue to consult with the Highway of Heroes Tree Campaign during detail design to explore opportunities for commemorative tree plantings in the study area.
Property	Property impacts will be confirmed during detail design, in consultation with affected property owners.
Air Quality	The project is expected to improve future traffic flow in the local road network and minimize the impact on future air quality. Measures to minimize impacts on air quality include incorporating vegetative barriers in the landscape design.
Noise	Based on the findings of the Noise Impact Assessment completed as part of this study, noise mitigation is not recommended for this project.
Traffic Operations	Advanced notification will be provided in advance of construction activities. The Staging and Detour Plans will be finalized during detail design.

Thank you for attending

Your input is important

3 ways to provide your comments:

-  Fill out a comment sheet and place it in the box
-  Email comments@highway401cobourgcolborne.ca
-  Or, mail your comments to:

Mr. Terry Hoekstra, C.E.T
Manager of Engineering
Town of Cobourg
740 Division Street, Building #7
Cobourg ON K9A 0H6

On Feb 24, 2023, at 7:15 PM, Robinson, Jennifer <Jennifer.Robinson@stantec.com> wrote:

Hello,

Thank you for taking the time to provide your comments. We apologize that you did not receive notification of Public Information Centre (PIC) 2. Your contact information has been added to the study mailing list and you will be directly notified of future study milestones, including the Notice of Study Completion. While we regret that you were not aware of PIC 2, the study team will be making a presentation about this study and answering questions at the upcoming **Northumberland County Public Works Committee meeting on February 27, 2023 at 9:00 AM**, which we hope you will be able to attend.

Your concerns regarding potential traffic impacts within the Township of Alnwick/Haldimand during construction have been noted by the study team. Please note that construction of the Preferred Plan is being planned in phases. This will allow for the replacement of the existing Nagle Road bridge to be independent of construction of the Nagle Road interchange ramps. While the timing of construction of the Nagle Road interchange is currently unknown, it is anticipated that the traffic demands associated with growth and development of the Cobourg East Secondary Plan area will necessitate a new interchange at Nagle Road. Additional transportation studies will be completed within the Town of Cobourg boundary in the future to confirm the need for additional roadway improvements, such as widening and/or reconstructing roadways to support future traffic demands, as development of the Cobourg East Secondary Plan area progresses.

Potential detour routes have been identified as part of this study to help plan for traffic detours along dedicated routes during the demolition of the existing Nagle Road bridge and construction of the new bridge. At this time, a section of Highway 401, between County Road 45 and County Road 25, is proposed to be closed for one overnight duration (approximately 12-18 hours) to accommodate demolition of the existing bridge. During this time, Highway 401 traffic will be re-routed to CR45, CR22, and CR 25. Additional short-term overnight Highway 401 closures may be required during the construction of the new bridge. The number and duration of those full closures will be confirmed during

detail design. Please note that preliminary construction phasing and potential detour routes will be presented at the upcoming Northumberland County Public Works Committee meeting.

A comprehensive mail out of the Notice of PIC 2 was undertaken which included a Canada Post Ad Mail Drop on January 9, 2023 to approximately 2,070 residences located along Canada Post delivery routes originating within the study area, some of which deliver to residences within the Township of Alnwick/Haldimand, along County Road 22 and Noble Road, among other local roads within the Township. The mail out also included, but was not limited to, mailing/emailing a copy of the notice to those on the study contact list (January 4, 2023), posting a copy of the notice on the Town of Cobourg website (January 5, 2023) and Township of Hamilton facebook page (January 6, 2023), and publishing a copy of the notice within the Northumberland News newspaper (January 5, 2023).

The Class Environmental Assessment (EA) study process, including the findings of the technical studies, the potential environmental impacts of the project and proposed mitigation measures, will be documented within a Transportation Environmental Study Report (TESR), which is tentatively scheduled to be completed in 2023. A Notice of Study Completion will be issued once the TESR has been completed, at which time it will become available for public comment for a minimum of 30 days. Additional details regarding this Class EA study, including the information shared at Public Information Centres 1 and 2, is available for review on the study website (Highway 401 Cobourg to Colborne (highway401cobourgcolborne.ca)).

Thank you again for taking the time to provide your comments. Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team.

Subject: Nagel Road expansion

Hello, my name is John Logel and I am the mayor of Alnwick Haldimand Township. We are one of seven municipalities that make up Northumberland County.

On Jan 18 2023 I received an aggressive text message from one of our residents. The writer stated he was disappointed that his mayor was not at the meeting to discuss the Nagel interchange project held that day at the Cobourg Community Centre. He was more concerned that the neighbouring mayor from Hamilton Township was in fact attending. I texted him back telling him I was not aware of any meeting.

I found out later and in fact I am looking at a letter from Stantec addressed to the mayor of Hamilton, inviting him to the meeting.

I am disappointed I was unable to attend.

I do realize this intersection is not located in our township, however should a Nagel interchange ever be constructed it will have a dramatic effect on my local township roads if highway 401 is ever closed between Nagel and County Rd 23. There are no County Roads running east/west along the 401. Only Danforth Rd running to the south of 401 would be available but it is simply not capable of being an ETR without major, major construction.

I look forward to a response and a opportunity to discuss my concerns.

Stay safe,

John

Subject: New interchange

I support the planning for this possible new interchange. My hope is the actual interchange will be open before the eastern development of Cobourg is completed.

The use of Division St cutoff by heavy vehicles will be dramatically reduced, and traffic flow improved for the area with this new cutoff.

The interchange should have longer than normal exit and entry lanes due to the high transport truck use, to ensure less accident potential.

Subject: Highway 401 Nagle Rd Interchange Study (GWP 4059-17-00), PIC 2 Comment Form
Attachments: [REDACTED]

Hello,

Thank you for attending Public Information Centre 2 and taking the time to provide your comments.

Your question regarding planned improvements to Nagle Road north of Highway 401 has been noted by the study team. The preliminary design work and the Class Environmental Assessment (EA) for the Highway 401 interchange is a continuation of a long-term planning process for the future configuration of the interchange ramps due to the planned growth in the Town of Cobourg and staging of the Nagle Road bridge replacement. As part of the technically preferred plan, the section of Nagle Road, from south of Danforth Road to just north of Highway 401, will be widened from two lanes to four lanes (two lanes in either direction); however, no other changes to Nagle Road are proposed as part of this study.

While the timing of construction for the Nagle Road interchange is currently unknown, the pace at which this development will occur will be driven by market conditions and the property owners of the land within the Cobourg East Community. However, it is expected that full buildout may not be achieved until decades into the future. Leading up to and following completion of the full buildout of the Cobourg East Community, it is anticipated that there will be an increase to vehicular traffic traveling on Nagle Road between Cobourg and Township of Hamilton, as a result of being adjacent to an urban growth area. Additional transportation studies will be completed within the Town of Cobourg boundary in the future to confirm the need for additional roadway improvements as development of the Cobourg East Community progresses. In order to be prepared for the potential future growth conditions outside of the Town of Cobourg boundary, the Township of Hamilton may also wish to complete long-range planning studies, including a transportation study, that would review the existing road network and include recommendations for road improvements such as road widenings and reconstruction.

The Class EA study process, including the findings of the technical studies, the potential environmental impacts of the project and proposed mitigation measures, will be documented within a Transportation Environmental Study Report (TESR), which is tentatively scheduled to be completed in late 2023. A Notice of Study Completion will be issued once the TESR has been completed, at which time it will become available for public comment for a minimum of 30 days. Additional details regarding this Class EA study, including the information shared at Public Information Centres 1 and 2, is available for review on the study website ([Highway 401 Cobourg to Colborne \(highway401cobourgcolborne.ca\)](http://Highway401CobourgtoColborne(highway401cobourgcolborne.ca))).

Thank you again for taking the time to provide your comments. Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team. Your contact information has been added to the study mailing list and you will be notified of future study milestones, including the Notice of Study Completion.

Kind regards,

Subject: Highway 401 Nagle Rd Interchange Study - PIC 2 Comment Form Response
Attachments: [REDACTED]

Hello,

Thank you for attending Public Information Centre 2 and for taking the time to provide your comments.

In response to your comment regarding the interchange configuration, the loop ramp on the north side of Highway 401 provides a free-flow movement, which is required to accommodate the anticipated large volume of traffic from the south (Nagle Road) to the west (Highway 401). If the configuration on the south side was used on the north side, the intersection could not accommodate the significant left-turn movement from the south to the west.

Thank you again for taking the time to provide your comments. Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team.

Kind regards,

Jenn Robinson

Attachments: [REDACTED]

Hello,

Your question regarding planned improvements to Nagle Road north of Highway 401 has been noted by the study team. The preliminary design work and the Class Environmental Assessment (EA) for the Highway 401 interchange is a continuation of a long-term planning process for the future configuration of the interchange ramps due to the planned growth in the Town of Cobourg and staging of the Nagle Road bridge replacement. As part of the technically preferred plan, the section of Nagle Road, from south of Danforth Road to just north of Highway 401, will be widened from two lanes to four lanes (two lanes in either direction); however, no other changes to Nagle Road are proposed as part of this study.

While the timing of construction for the Nagle Road interchange is currently unknown, the pace at which this development will occur will be driven by market conditions and the property owners of the land within the Cobourg East Community. However, it is expected that full buildout may not be achieved until decades into the future. Leading up to and following completion of the full buildout of the Cobourg East Community, it is anticipated that there will be an increase to vehicular traffic traveling on Nagle Road between Cobourg and the Township of Hamilton, as a result of being adjacent to an urban growth area. Additional transportation studies will be completed within the Town of Cobourg boundary in the future to confirm the need for additional roadway improvements as development of the Cobourg East Community progresses. In order to be prepared for the potential future growth conditions outside of the Town of Cobourg boundary, the Township of Hamilton may also wish to complete long-range planning studies, including a transportation study, that would review the existing road network and include recommendations for road improvements such as road widenings and reconstruction.

Please note that the study area is located outside the limits of source water protection areas, and due to the intervening distance of the project from Baltimore, impacts to the community's groundwater supply are not anticipated. However, impacts to groundwater within the vicinity of the project will be further reviewed during the detail design phase of the project.

The Class EA study process, including the findings of the technical studies, the potential environmental impacts of the project and proposed mitigation measures, will be documented within a Transportation Environmental Study Report (TESR), which is tentatively scheduled to be completed in late 2023. A Notice of Study Completion will be issued once the TESR has been completed, at which time it will become available for public comment for a minimum of 30 days. Additional details regarding this Class EA study, including the information shared at Public Information Centres 1 and 2, is available for review on the study website ([Highway 401 Cobourg to Colborne \(highway401cobourgcolborne.ca\)](http://Highway 401 Cobourg to Colborne (highway401cobourgcolborne.ca))).

Thank you again for taking the time to provide your comments. Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team. Your contact information has been added to the study mailing list and you will be notified of future study milestones, including the Notice of Study Completion.

Kind regards,

Jenn Robinson

COMMENT FORM

Highway 401 Nagle Road Interchange Study (GWP 4059-17-00)

Public Information Centre (PIC) 2, Cobourg Community Centre
Wednesday, January 18, 2023

Please provide your comments on the information presented today. Please use the back of this comment form if you require more space. For additional information about the study, including a copy of the PIC displays presented today, or to submit further comments, please visit the project website at www.highway401cobourgcolborne.ca.

Comments:

Glad to see that 1.5m bike lanes are planned for Nagle. Also happy to see that the preferred option only has one point of conflict for cyclists. The "T" style entry points off the highway are much safer than acceleration ramps. The method of dealing with the single point of conflict is not ideal but at least provides a safe option for families and novice cyclists.

Subject: HWY 401 Nagle Rd Interchange Study - PIC 2 Comment Form Response
Attachments: [REDACTED] 1106_nagle_PREFERED-PLAN-Plan.pdf

Hello,

Thank you for attending Public Information Centre (PIC) 2 where we discussed access to the remaining parcel of your property that is not required for the proposed Nagle Road interchange.

Please note that although the remaining parcel will have frontage on Nagle Road, the Ministry of Transportation Ontario's (MTO) current corridor standards require that a minimum of 125 m spacing be provided between a private non-signalized access and a highway ramp terminal. Based on the preferred plan, the spacing between this potential private access does not satisfy the current minimum standard spacing requirements. However, timing of the property acquisitions and interchange construction is currently unknown. Until such time that the project advances to the stage of acquiring land, you can continue to enjoy your property in its current use.

As requested, a copy of the preferred plan that was presented at PIC 2 is attached for your reference.

Thank you again for taking the time to provide your comments. Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team.

Kind regards,

Jenn Robinson

Subject: RE: Highway 401 Nagle rd interchange study
Attachments: 1106_nagle_PREFERRED-PLAN-Plan.pdf

Hello,

Thank you for taking the time to provide your comments.

The need for a new Highway 401 interchange at Nagle Road was initially identified in the Cobourg East Community Secondary Plan, approved by Cobourg Council in 2005, to meet the transportation objectives identified in the Town of Cobourg Official Plan. The potential future Highway 401 interchange at Nagle Road was also identified on Schedule 'A' of the Township of Hamilton Official Plan, which was adopted by Council in 2010. The purpose of this Class Environmental Assessment (EA) study is to identify a preferred plan that addresses the future transportation and planning needs in the study area. At the completion of this study, the preferred plan will be confirmed and the lands that are anticipated to be directly impacted by the preferred plan will be designated (i.e. protected) for future construction of the interchange.

While the timing of construction of the Nagle Road interchange is currently unknown, it is anticipated that the traffic demands associated with growth and development of the Cobourg East Community will necessitate a new interchange at Nagle Road. The pace at which this development will occur will be driven by market conditions and the property owners of the land within the Cobourg East Community, and full buildout may not be achieved until decades into the future. Until such time, residents can continue to enjoy their property in its current use. Additional transportation studies will be completed within the Town of Cobourg boundary in the future to confirm the need for additional roadway improvements, such as widening and/or reconstructing to support future traffic demands, as development of the Cobourg East Secondary Plan area progresses.

The preferred plan will be constructed in several phases to accommodate bridge rehabilitation/replacement needs and development growth. As such, the Nagle Road bridge improvements may occur independently from the implementation of the Nagle Road interchange. However, the timing of each phase will be dependent on the bridge condition and the actual timing of development of the Cobourg East Community. As illustrated within the attached figure, the preferred plan for the Highway 401 Nagle Road bridge includes a 1.64 m wide sidewalk and 1.5 m wide bike lane on either side of the structure.

A comprehensive evaluation process was undertaken to identify a preferred design that best addresses the current and future transportation needs, while minimizing impacts to the community and natural environment. The evaluation process considered a broad range of criteria, including but not limited to traffic operations, constructability, geometrics and safety, as well as potential environmental impacts (i.e., natural, social and cultural), including potential to impact private property. Natural environment considerations included potential to impact wildlife and Species at Risk habitat, forest communities, environmentally sensitive areas and fish and fish habitat. As such, the proposed design was selected because it minimizes potential impacts to the environment while providing access to the planned Cobourg East Community in the Town of Cobourg.

Please note that the study area is located outside the limits of source water protection areas, and while impacts to groundwater supply is not anticipated, the potential to impact groundwater within the vicinity of the project will be further reviewed during the detail design phase of the project. In addition, a number of technical studies have been completed as part of this project, including terrestrial and aquatic ecosystems assessments, copies of which will be available for review as part of the Transportation Environmental Study Report (TESR), which is tentatively scheduled to be completed in 2023. A Notice of Study Completion will be issued once the TESR has been completed, at which time it will become available for public comment for a minimum of 30 days. Additional details regarding this Class EA study, including the information shared at Public Information Centres 1 and 2, is available for review on the study website (Highway 401 Cobourg to Colborne (highway401cobourgcolborne.ca).

Thank you again for taking the time to provide your comments. Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team. Your contact information has been added to the study mailing list and you will be notified of future study milestones, including the Notice of Study Completion.

Subject: Highway 401 Nagle rd interchange study

Hello to whom ever this subject concerns.

My wife and I are local residents who live [REDACTED]. We are highly against the proposed idea of creating a new interchange at the Nagle road bridge. Not only is it not necessary, the interchange would bring unwanted traffic and congestion to this quiet area that does not have the info structure to support more traffic as it is. The proposed roadway changes would directly affect our daily commutes to work negatively as the proposed road changes show Danforth rd E Turing into cul-de-sacs on both sides of Nagle causing us to have to go out of our way to get around Nagle rd. Not only is this an inconvenient design for us human residents the environmental impacts of the landscape change would be devastating to the wildlife that call this area home as well. We have many deer who call this area home and many other species of animals such as birds and small mammals like raccoons and squirrels to name a few that make their homes in these trees every year, which would need to be cut down and removed in order to widen and expand the roadways. Also I would like to make mention of how this would effect our water tables? This area is already a valley that water naturally runs into. How will this expansion effect these natural water ways and run off's and the residents wells? We also do not support the townships plan to purchase land and homes in the area just to demolish them for this project. We understand that the future plan shows more housing coming into the area but that is not for years to come and we are currently in a housing crisis and the township wants to remove people from their homes and take away more desperately needed houses right now? This is insanity and should not be allowed at this point in time. If the future plan is for this idea than maybe it would be better suited to build the width of the bridge to suit the future plans but leave the surrounding area the way it is until the change in roadways is desperately needed. The extra width could be used to support bike lanes for cyclists that frequently pass over the bridge during the warmer months, as there is currently no shoulder space on the bridge. This is a safety hazard when vehicles and cyclists are crossing the bridge at the same time. We hope that our input is taken into serious consideration as we are the ones who this decision directly impacts.

Thank you,

Sincerely [REDACTED]

RE: Nagle Rd.

Hello,

Thank you for taking the time to provide your comments.

Your concern regarding the ability of Danforth Road East to safely accommodate future travel has been noted by the study team. While the timing of construction of the Nagle Road interchange is currently unknown, it is anticipated that the existing Highway 401 interchanges within Cobourg will not support the traffic demands associated with development of the Cobourg East Secondary Plan area, at which time the need for an interchange at Nagle Road will be required. Additional transportation studies will be completed within the Town of Cobourg boundary in the future to confirm the need for additional roadway improvements, such as widening and/or reconstructing to support future traffic demands, as development of the Cobourg East Secondary Plan area progresses.

The Class Environmental Assessment (EA) study process, including the findings of the technical studies, the potential environmental impacts of the project and proposed mitigation measures, will be documented within a Transportation Environmental Study Report (TESR), which is tentatively scheduled to be completed in late 2023. A Notice of TESR Completion will be issued once the TESR has been completed, at which time it will become available for public comment for a minimum of 30 days. Additional details regarding this Class EA study, including the information shared at Public Information Centres 1 and 2, is available for review on the study website ([Highway 401 Cobourg to Colborne \(highway401cobourgcolborne.ca\)](http://Highway 401 Cobourg to Colborne (highway401cobourgcolborne.ca))).

Thank you again for taking the time to provide your comments. Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team. Your contact information has been added to the study mailing list and you will be notified of future study milestones, including the Notice of TESR Completion.

To Whom It May Concern,

As a resident in Hamilton Township on [REDACTED] Cobourg I feel increased traffic and no upgrade to the road is detrimental to all. Danforth Rd. is a danger at the best of times with speeding and minimal enforcement. The shoulder of the road is very narrow and when the 401 is blocked truckers and other travelers are rerouted to travel Danforth Rd. I am very concerned that there will be more traffic on Danforth Rd. E. as the interchange is so close. Regards [REDACTED]

Subject: Nagel rd. 401 interchange

Dear Sirs.

I am not sure how this plan came to be ,but I can only assume it was put forward by people not familiar with Nagel rd nor Danforth rd east ,two of the worst maintained rds. in Hamilton township. On tues. Jan 17th Danforth still had snow and ice on it from the sorm the week before.people already use it as a race track including dumptrucks. This rd even in summer is barely fit to have two lanes of traffic due to its narrowness where gard rails are. The edges of Nagel rd are rough and worn from constant dumptruck traffic making it a hazard. To think that anyone would concider increasing traffic on these rds is Ludacris. The other point being there is no where for this traffic to go other than hwy. 45 where there is already a recently improved interchange or the other direction to hwy two via Danforth rd. To Grafton where there is already an interchange. So I would ask that this matter is carefully concidered and that the conclusion you draw is in keeping with the wishes of the people who live on these rds. And pay taxes and vote

Sincerely

[REDACTED]

Dear [REDACTED]

Reference: Highway 401 Interchange at Nagle Road – Preliminary Design and Environmental Assessment Study, Letter Received March 1, 2023

Thank you for providing comments on behalf of [REDACTED]. Your letter was received by the study team on March 1, 2023.

Please note that the study team previously corresponded with [REDACTED] in January 2023, at which time it was noted that based on the preferred plan as presented at Public Information Centre (PIC) 2 on January 18, 2023, no direct impacts to the property located at 2241 Nagle Road are anticipated. A copy of this previous correspondence and the preferred plan are attached to this letter for your reference.

The Nagle Road interchange study is the Town of Cobourg's initiative, therefore any questions related to the property impacts should be directed to Terry Hoekstra, Manager Engineering, Town of Cobourg at 905-372-9971, ext. 4371, or via email at thoekstra@cobourg.ca.

The Class Environmental Assessment (EA) study process, including the findings of the technical studies, the potential environmental impacts of the project and proposed mitigation measures, will be documented in a Transportation Environmental Study Report (TESR), which is tentatively scheduled to be completed in 2023. A Notice of Study Completion will be issued once the TESR has been completed, at which time it will become available for public comment for a minimum of 30 days. Additional details regarding this Class EA study, including the information shared at PIC 1 and PIC 2, is available for review on the study website highway401cobourgcolborne.ca.

Should you have any further questions and/or concerns please do not hesitate to contact the undersigned or the study team at comments@highway401cobourgcolborne.ca. Your contact information has been added to the project mailing list, and you will be notified of key project milestones, including the Notice of Study Completion.

Follow Up Flag: Follow up
Flag Status: Flagged

Dear [REDACTED],

In response to your first question about the engagement of Stantec, the Ministry of Transportation (MTO) and the Town of Cobourg (Town) are working collaboratively to advance the planning of the Nagle Road interchange that were previously identified in Official Plans for Town of Cobourg and Township of Hamilton. Stantec has been retained by MTO to complete this study, and the Town is funding the study through a legal agreement between MTO and the Town.

Regarding your second question about indirect impacts, we are currently completing various studies to identify potential impacts and mitigation. Potential impacts and mitigation associated with the project will be documented in a Transportation Environmental Study Report that will be available for a 30-day public comment period. Additional future studies may be required as development of the Cobourg East community progresses.

We further note that the timing of the Cobourg East development and the construction of the interchange is not known. The Cobourg East community will continue to develop based on market conditions, and the interchange will only be constructed when the development triggers the need for the interchange.

Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team.

Kind regards,

Jenn Robinson

Environmental Planner, Transportation GTA

In addition, I still look forward to hearing back from you on whether my property is or is not considered by you to be indirectly impacted notwithstanding your determination that it is not directly impacted. This requested clarification was sought by me yesterday and I have yet to receive a response.

Dear Jennifer:

I need to brief my legal team on the status of a number of things and one of the questions relates to the terms of the engagement of Stantec? I have seen official letters with direct, impacted homeowners suggesting that Stantec has been engaged by MTO and Cobourg.

There must be one or more engagement letters and I would like to know what the scope of the engagement(s) is (are), how it is being paid and by whom. In that regard, I would ask for a copy or copies of the actual underlying engagements in connection with this project.

I look forward to hearing back from you. Should you have any questions, please feel free to reach out to me.

CAUTION: External Email

Hello,

Please note that the need for a new Highway 401 interchange at Nagle Road was initially identified in the Cobourg East Community Secondary Plan, approved by Cobourg Council in 2005 to meet the transportation objectives identified in the Town of Cobourg Official Plan. The potential future Highway 401 interchange at Nagle Road is also identified in the Township of Hamilton Official Plan Schedule 'A' - Land Use (July 2012).

The purpose of this study is to identify a Recommended Plan that addresses future transportation and planning needs in the study area. As indicated within the Notice of Public Information Centre (PIC) 2, this is a Group B project under the Class Environmental Assessment (EA) for Provincial Transportation Facilities (2000). As part of the Class EA process for projects of this nature, reasonable alternatives are to be considered to address the problems and opportunities. Once the best alternative is selected, Alternative Methods of Carrying out the Undertaking are assessed. The assessment of Alternatives to the Undertaking, including 'Do Nothing' and 'New Interchange' were presented at PIC 1, the findings of which indicated that the 'Do Nothing' alternative did not address the transportation and planning needs in the study area, and that a new interchange would provide direct access between Highway 401 and adjacent lands. As such, only interchange design alternatives were subsequently developed and evaluated to identify a preliminary preferred plan.

Since Public Information Centre (PIC) 1, the project team has been developing and evaluating alternative design concepts to identify a preliminary preferred plan. Due to the COVID-19 pandemic and associated physical distancing requirements, PIC 2 was delayed until an in-person PIC could be held safely. A second PIC has now been arranged to present and gather feedback on the evaluation of alternatives, the preliminary preferred plan, and the preliminary assessment of the anticipated environmental impacts and mitigation measures. While we regret that you will be unable to attend PIC 2 in-person, please note that a copy of the PIC display materials, including a copy of the evaluation of alternatives and preliminary preferred plan, will be posted online on the project website (<http://www.highway401cobourgcolborne.ca/>) on January 19, 2023.

Property owners who have the potential to be directly impacted (i.e., property acquisition required, in whole or in part) by the preliminary preferred plan have been contacted by letter (and email, where possible) to discuss the preliminary preferred plan, the anticipated impacts to their property and any questions or concerns they may have. Based on the preliminary preferred plan, direct impacts to your property are not anticipated. However, you are invited to contact any of the project team members listed within the attached notice to discuss any additional questions or concerns you may have.

The Class EA process, including the findings of the technical studies, the potential environmental impacts and proposed mitigation measures, will be documented within a Transportation Environmental Study Report (TESR), which is tentatively scheduled to be completed in late 2023. A Notice of TESR Completion will be issued once the TESR has been completed, at which time it will become available for public comment on the project website for a minimum of 30 days.

Should you have any additional questions, comments or concerns, please do not hesitate to contact the project team.

Kind regards,

Jenn Robinson

Subject: RE: Highway 401 Nagle Rd Interchange Study (GWP 4059-17-00), Notice of PIC 2

Dear Jennifer:

In follow-up to my email below, I am now advised that you have been sharing communications with other property owners on Nagle Rd.

that are strikingly different than the communication shared with me by you yesterday below. The communications I have seen contain, among others, the following statements:

1. A preliminary preferred plan has been identified, which I can only assume leads toward Nagle Rd. as the interchange rather than any other options; and
2. Requests to directly impacted property owners to have a private virtual meeting/teleconference on January 12th.

As the owner of [REDACTED]

[REDACTED], I have not received any such correspondence and find it to be absolutely unfathomable, in light of my earlier communications with various members of Stantec and others, that I am somehow deemed by you not to be an impacted property owner.

Once again, I ask for copies of all studies that underpin the preliminary preferred plan recommendations and supporting rationales versus all other options for the placement of a new interchange in Cobourg.

Thank you.

Subject: RE: Highway 401 Nagle Rd Interchange Study (GWP 4059-17-00), Notice of PIC 2

Dear Jennifer:

The last communication I had concerning this matter was January 23, 2020 – shortly before the pandemic – nearly 3 years ago now.

In the communication I received from your colleague at Stantec, namely Nevena Gazibara, at that time indicated, among other things:

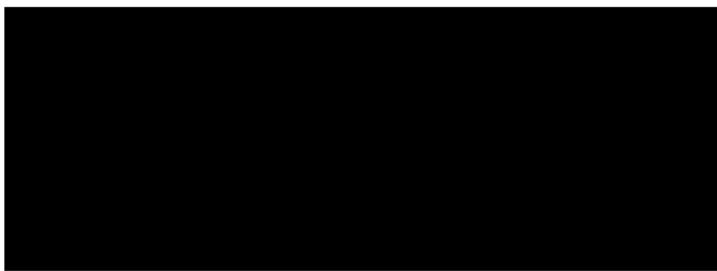

“During the next phase of the study, a detailed evaluation of alternatives will be completed to identify a Recommended Plan that is cost-effective and provides safe operations, while minimizing impacts to the natural, social, and cultural environments. This will be accomplished by identifying evaluation criteria along with their relative importance, and then ranking the overall scores of the alternatives. The Recommended Plan will be presented at the second Public Information Centre, which is tentatively scheduled for Spring 2020.”

Since that communication, I have received no further communications about the process and have not received either a detailed evaluation of alternatives or a recommended plan. Do either exist and, if so, please provide them to me as soon as possible.

Finally, you have provided me with notice of a meeting that is 2 weeks away from today. That date is not convenient for me, as I will be out-of-country. Accordingly, I would ask that you advise me of what accommodations will be made to ensure I am fully briefed on all matters to be discussed at and information shared at such meeting? If that is not possible, then I would ask that the meeting be deferred until such time as the promised information is shared and I can be present.

Time is of the essence here and I would ask for an immediate response forthwith.

Thank you.

Hello,

Please find the attached Notice of Public Information Centre (PIC) 2 in relation to the **Preliminary Design and Class Environmental Assessment for the Highway 401 Nagle Road Interchange Study (GWP 4059-17-00)**.

This in-person PIC will be held in a drop-in format and has been scheduled as follows:

Date: Wednesday, January 18, 2023

Location: Cobourg Community Centre, 750 D'Arcy Street, Cobourg, Ontario

Time: 4:00 PM to 7:00 PM

Should you have any questions, comments or concerns related to this study, please do not hesitate to contact the study team (comments@highway401cobourqcolborne.ca).

Kind regards,

Jenn Robinson
