NOTICE OF STUDY COMMENCEMENT
PRELIMINARY DESIGN AND CLASS ENVIRONMENTAL ASSESSMENT
Highway 401 Planning Study from Cobourg to Colborne, GWP 4060-11-00

The Ontario Ministry of Transportation (MTO) has retained Stantec Consulting Ltd. to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study on Highway 401 for the replacement and rehabilitation of structures, interchange modifications, future widening of the highway, and commuter parking lot expansions, from 2 km east of Nagle Road to Percy Street (approximately 18 km). The purpose of the study is to identify a Recommended Plan that addresses current and future transportation needs in the study area as part of the Ministry's ongoing review of safety and operational needs for the provincial highway network.

This study will include reviewing existing conditions, developing and evaluating alternatives, identifying appropriate improvements, and developing environmental protection / mitigation measures. A Recommended Plan will be confirmed and designated (protected) at the completion of the study.

THE PROCESS

This study is a "Group B" project under the *Class Environmental Assessment (EA) for Provincial Transportation Facilities* (2000) and includes undertaking environmental and engineering field investigations and seeking input from stakeholders. Two Public Information Centres (PICs) are planned, and notices of the PICs will be advertised in local newspapers and sent to the project mailing list.

Upon completion of preliminary design, a *Transportation Environmental Study Report* (TESR) will be prepared and made available for public review. Notices will be published in local newspapers to advise the public of the TESR public review period.

COMMENTS

You are encouraged to participate in the study and to provide comments in writing to the project team. If you wish to have your name added to the project mailing list or have questions about the study, please contact:

Toll-free: 1-800-267-0295
comments@highway401cobourgcoborne.ca

You are encouraged to visit the project website, www.highway401cobourgcoborne.ca, where project information including study notices, background information, PIC displays, and the TESR will be made available as the study progresses. You can also submit comments to the project team on the project website.

If you have any accessibility requirements in order to participate in this project, please contact one of the Project Team members listed above.

Comments and information are being collected to assist the MTO in meeting the requirements of the *Ontario Environmental Assessment Act*. Information will be collected in accordance with the *Freedom of Information and Protection of Privacy Act*. All comments will be maintained on file for use during the study and, with the exception of personal information, may be included in study documentation and become part of the public record.

Dear Chief Williams:

**Reference: Preliminary Design and Class Environmental Assessment
Highway 401 Planning Study, Cobourg to Colborne, GWP 4060-11-00
Notice of Study Commencement**

The Ontario Ministry of Transportation (MTO) has retained Stantec Consulting Ltd. to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study on Highway 401 for the replacement and rehabilitation of structures, interchange modifications, future widening of the highway, and commuter parking lot expansions, from 2 km east of Nagle Road to Percy Street (approximately 18 km). A copy of the Notice of Study Commencement and a comment form are enclosed.

The purpose of the study is to identify a Recommended Plan that addresses current and future transportation needs in the study area as part of the Ministry's ongoing review of safety and operational needs for the provincial highway network.

This study will include reviewing existing conditions, developing and evaluating alternatives, identifying appropriate improvements, and developing environmental protection and mitigation measures. A Recommended Plan will be confirmed and designated (protected) at the completion of the study.

The study includes:

- Collecting and reviewing relevant background information and seeking input from the public, Indigenous communities, and external ministries/agencies
- Carrying out field investigations to confirm environmental and engineering information
- Detailed natural science, fisheries, migratory bird, and noise studies
- A Stage 1 Archaeological Assessment

This preliminary design study is following an approved planning process under the *Class Environmental Assessment for Provincial Transportation Facilities* (2000) for a Group "B" project and will document the existing conditions and sensitivities of the study area, examine potential impacts/changes, give recommendations for proposed mitigation, and outline any commitments for future environmental work.

Hagersville ON N0A 1H0

Dear Chief LaForme:

**Reference: Preliminary Design and Class Environmental Assessment
Highway 401 Planning Study, Cobourg to Colborne, GWP 4060-11-00
Notice of Study Commencement**

The Ontario Ministry of Transportation (MTO) has retained Stantec Consulting Ltd. to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study on Highway 401 for the replacement and rehabilitation of structures, interchange modifications, future widening of the highway, and commuter parking lot expansions, from 2 km east of Nagle Road to Percy Street (approximately 18 km). A copy of the Notice of Study Commencement and a comment form are enclosed.

The purpose of the study is to identify a Recommended Plan that addresses current and future transportation needs in the study area as part of the Ministry's ongoing review of safety and operational needs for the provincial highway network.

This study will include reviewing existing conditions, developing and evaluating alternatives, identifying appropriate improvements, and developing environmental protection and mitigation measures. A Recommended Plan will be confirmed and designated (protected) at the completion of the study.

The study includes:

- Collecting and reviewing relevant background information and seeking input from the public, Indigenous communities, and external ministries/agencies
- Carrying out field investigations to confirm environmental and engineering information
- Detailed natural science, fisheries, migratory bird, and noise studies
- A Stage 1 Archaeological Assessment

This preliminary design study is following an approved planning process under the *Class Environmental Assessment for Provincial Transportation Facilities* (2000) for a Group "B" project and will document the existing conditions and sensitivities of the study area, examine potential impacts/changes, give recommendations for proposed mitigation, and outline any commitments for future environmental work.

Notice of Study Commencement**

Stantec Consulting Ltd. has been retained by the Ontario Ministry of Transportation (MTO) to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study on Highway 401 for the replacement and rehabilitation of structures, interchange modifications, future widening of the highway, and commuter parking lot expansions, from 2 km east of Nagle Road to Percy Street (approximately 18 km).

The purpose of the study is to identify a Recommended Plan that addresses current and future transportation needs in the study area as part of the Ministry's ongoing review of current and future safety and operational needs for the provincial highway network.

Two Public Information Centres (PICs) are planned, and notices of the PICs will be advertised in local newspapers and sent to the project mailing list. Upon completion of preliminary design, a *Transportation Environmental Study Report* (TESR) will be prepared and made available for public review. Notices will be published in local newspapers to advise the public of the TERS public review period. A copy of the Notice of Study Commencement is attached.

The purpose of this letter is to introduce the project, to seek your input on the existing conditions within the study area, and to identify any issues, concerns or approval requirements that your organization may have. Your input is requested by June 8, 2018. A comment sheet is attached to facilitate your feedback.

You are encouraged to visit the project website, www.highway401cobourgcoborne.ca, to obtain current project information and to submit comments to the project team. If you have any questions regarding the study, please contact the undersigned or one of the Project Managers named in the enclosed material.

CCN's Hospice Hike event returns Sunday

SARAH HYATT

sarah.hyatt24@gmail.com

Brighton - Community Care Northumberland is once again asking Brightonians to lend a hand with its Hospice Services program.

"We care for and follow people wherever they go, even if someone is sent to hospital," said Cheryl McFarlane, CCN's regional hospice co-ordinator. "It's about continuity for us - wherever home is [at the time] that's where we go."

In May, CCN will host its eighth annual Hospice Hike event at Memorial Park. The event is a major fundraiser for the hospice program and CCN is hopeful residents will show their support and help families and individuals in need of palliative and end-of-life care.

CCN relies on donations and volunteers to maintain its "visiting hospice" program. This year's goal is to raise \$10,000 to ensure services continue.

People may want to participate in this event in honour of a "neighbour, friend or loved one," said McFarlane. Sometimes, teams come for a classmate, she added.

Residents may recall the weather hasn't been all that kind to CCN in recent years. Extreme rainfall and flooding concerns cancelled last year's event and the year before Proctor Park was too "treacherous" for the five-kilometre hike.

McFarlane has her fingers crossed Mother Nature will be in a more benevolent mood this year.

"This event for us is as much about raising awareness as it is about fundraising," said the co-ordinator.

The hospice program offers care to residents with a life-limiting illness and their families.

These supports are offered countywide and at no cost.

Hospice services aim to improve quality of life for residents and their loved ones, from the time of diagnosis, to right up until the last moment of a person's life and even beyond that for families as they deal with the loss of a loved one.

"Our trained volunteers fo-

"It's about continuity for us - wherever home is [at the time] that's where we go."

-Cheryl McFarlane, CCN regional hospice co-ordinator

cus on dignity and individual needs as they provide compassionate care and support to clients and their families," said Trish Baird, CCN's executive director.

As people's needs change, volunteers travel with residents and care for people in family homes, hospitals, residential hospices and retirement and long-term care homes.

McFarlane is looking forward to the community coming together in May.

Seeing everyone in the park, it means a lot, she said.

Often, the people attending all have a story to share and that connecting piece is another nice component to the event, she said.

The event on Sunday, May 6 runs from 10 a.m. to noon and there is a one-kilometre stroll or five-kilometre hike. The opening ceremony is set for 10:30 a.m.

The Rotary Club of Brighton is once again hosting a barbecue with all proceeds donated to CCN and the YMCA will help get the crowd warmed up before the walk.

New this year, Brighton cadets are volunteering to help with setup, will guide and marshal the hike and walk routes and are also helping raise awareness for the event.

"It's always cool to see youth have a presence at this event," said McFarlane. "They're fantastic little ambassadors."

CCN is thankful to the many Brighton groups and volunteers making this event possible, McFarlane added.

To register as a participant or to make a pledge, residents can visit a CCN office or www.commcare.ca.

NOTICE OF STUDY COMMENCEMENT PRELIMINARY DESIGN AND CLASS ENVIRONMENTAL ASSESSMENT Highway 401 Planning Study from Cobourg to Colborne GWP 4060-11-00

The Ontario Ministry of Transportation (MTO) has retained Stantec Consulting Ltd. to undertake a Planning, Preliminary Design, and Class Environmental Assessment (Class EA) Study on Highway 401 for the replacement and rehabilitation of structures, interchange modifications, future widening of the highway, and commuter parking lot expansions, from 2 km east of Nagle Road to Percy Street (approximately 18 km).

The purpose of the study is to identify a Recommended Plan that addresses current and future transportation needs in the study area as part of the Ministry's ongoing review of safety and operational needs for the provincial highway network.

This study will include reviewing existing conditions, developing and evaluating alternatives, identifying appropriate improvements, and developing environmental protection/mitigation measures. A Recommended Plan will be confirmed and designated (protected) at the completion of the study.

THE PROCESS

This study is a "Group B" project under the Class Environmental Assessment (EA) for Provincial Transportation Facilities (2000) and includes undertaking environmental and engineering field investigations and seeking input from stakeholders. Two Public Information Centres (PICs) are planned, and notices of the PICs will be advertised in local newspapers and sent to the project mailing list.

Upon completion of preliminary design, a Transportation Environmental Study Report (TESR) will be prepared and made available for public review. Notices will be published in local newspapers to advise the public of the TESR public review period.

COMMENTS

You are encouraged to participate in the study and to provide comments in writing to the project team. If you wish to have your name added to the project mailing list or have questions about the study, please contact:

Mr. Gregg Cooke, P.Eng.
Consultant Project Manager
Stantec Consulting Ltd.
200-835 Paramount Drive
Stoney Creek, ON L8J 0B4
tel: 905-381-3227
cell collect: 905-385-3234
e-mail: comments@highway401cobourgcoborne.ca

Mr. Muhammad Waseem, P.Eng.
Project Engineer
Ministry of Transportation Eastern Region
1355 John Counter Boulevard, Postal Bag 4000
Kingston, ON K7L 5A3
tel: 613-545-4743
toll-free: 1-800-267-0295
e-mail: comments@highway401cobourgcoborne.ca

You are encouraged to visit the project website, www.highway401cobourgcoborne.ca, where project information including study notices, background information, PIC displays, and the TESR will be made available as the study progresses. You can also submit comments to the project team on the project website.

If you have any accessibility requirements in order to participate in this project, please contact one of the Project Team members listed above.

Comments and information are being collected to assist the MTO in meeting the requirements of the Ontario Environmental Assessment Act. Information will be collected in accordance with the Freedom of Information and Protection of Privacy Act. All comments will be maintained on file for use during the study and, with the exception of personal information, may be included in study documentation and become part of the public record.

Cobourg firefighters saw highest number of calls in 2017

"We're responding to our own success ... and the town is really growing": fire chief

DOMINIK WISNIEWSKI

dwisniewski@northumberlandnews.com

COBOURG - The fire department in Cobourg continues to see their incident response number grow after hitting an all-time high of 1,395 last year.

"That's a huge increase in 20 years," said Cobourg Fire Chief Mike Vilneff, who this week provided council with the first in a series of new quarterly updates from the fire service. "When I came to this town 20 years ago we were sitting right around 600 calls a year, so we have more than doubled in 20 years."

The reason for this increase is in part due to an aging population and the town's continued growth, he said.

"The town is getting busier, there is more cars on the street and there is more pedestrians getting hit," Vilneff said. "We're responding to our own success basically and the town is really growing."

According to the chief, 2018 got off to a bad start with a 10 per cent increase over last year's numbers - the busiest quarter in the history of the department.

"We're hoping that things will slow down but we're not optimistic about that," he added.

The sheer volume of calls is also taking a toll on fire prevention and training activities, he said, pointing out that incident response calls take up time that would otherwise be spent on their other duties.

Coun. Brian Darling, who served over 30 years as a member of the Cobourg Fire Department before retiring from the role of captain, said it is inevitable that the service will eventually have to hire more full-time firefighters.

He also pointed to one downside of the exemplary level of training being provided to local volunteer firefighters.

"They love the job so much they apply elsewhere and I think the Town of Cobourg has fed about six firefighters to areas like Peterborough, Whitby and Oshawa," he said. "That depletes our ranks of well trained volunteer firefighters."

Asked about staffing projections, Vilneff said there is no data at the moment but said "I would think in five to seven years we would probably be looking at another person on shift."

"It's not just another person on shift, but we have to look at fire prevention and training," the fire chief said. "Those roles right now are becoming almost maxed out."

Dear Mr. [REDACTED]

**Reference: Preliminary Design and Class Environmental Assessment
Highway 401 Planning Study from Cobourg to Colborne
GWP 4060-11-00 – Response to Comments Received**

Thank you for your interest in the above-mentioned project. Your comments with respect to your property have been noted and forwarded to the project team for consideration.

This planning study for Highway 401 includes the replacement and rehabilitation of structures, interchange modifications, future widening of the highway, and commuter parking lot expansions, from 2 km east of Nagle Road to Percy Street (approximately 18 km). The purpose of the study is to identify a Recommended Plan that addresses current and future transportation needs in the study area as part of the Ministry's ongoing review of safety and operational needs for the provincial highway network.

The study will include reviewing existing conditions, developing, and evaluating alternatives, identifying appropriate improvements, and developing environmental protection/mitigation measures. This study also includes field investigations for natural heritage studies, archaeology, contamination and foundations investigations. Several design alternatives will be developed and evaluated as part of this Preliminary Design study to determine the Recommended Plan. Alternatives will be available for review at the first Public Information Centre (PIC), tentatively planned for the spring of 2019.

As part of this evaluation process, property impacts will be considered and avoided/minimized where possible. Your input is encouraged throughout the study to aid in the evaluation process to determine the Recommended Plan.

Your contact information has been added to the project mailing list, and you will be notified in advance of the first Public Information Centre and at key project milestones.
